Acknowledgements

The present work was carried out at The National Research Center in Complementary and Alternative Medicine (NAFKAM), Department of Community Medicine, University of Tromsø.

Many people have been valuable to me in the work with this thesis, and I will first of all thank my supervisor Vinjar Fønnebø who not only employed me at NAFKAM after an interview that made all our differences clear, but also backed me up when the storms were riding the sea. Thank you for believing in me, supporting me and guiding me all the way along. My co-supervisor who became my main supervisor half way through, Arne Johan Norheim, you have played a very important role in this work. Not only by giving valuable guidance and input all the way through, but also by keeping the speed up and making this a cheerful journey with a lot of laughter.

My co-research fellows, Trine, Anita and Mona, thank you for being there for me during this long journey, and for many exciting trips around the world to research conferences. Åsa, Brit, Kari and Solveig, your technical support has been invaluable to me, and to all my colleges at NAFKAM – thank you for your help, advice, long lunches and small talk in the corridors.

I would like to thank the staff at The Cancer Registry of Norway for help collecting data to the first two papers and the people behind the Tromsø Cohort study for valuable support during the work with the last two papers in the thesis.
To my husband, Steini and my children Embla, Magnus and Maria Liv, thank you for your patience with my long working hours and for drawing my attention away from research questions at our farm in Balsfjord.

Last, but not the least my gratitude goes to my parents who always believed in me and made me understand that the impossible could be possible if I only tried hard enough. I dedicate this thesis to my late father Egil, who died of cancer in 1995. You are the reason for this work.

Definitions

Complementary and alternative medicine (CAM)

Many different definitions of CAM treatment have been provided, and the definitions vary widely between countries and organizations. In this thesis I apply the definition used in §2 in the Norwegian law about alternative treatment, Lov om alternativ behandling mv (2003–06–27–64), as all the studies included in this thesis are conducted in Norway:

"Med alternativ behandling menes helserelatert behandling som utøves utenfor helsetjenesten, og som ikke utøves av helsepersonell. Behandling som utøves i helsetjenesten eller av autorisert helsepersonell, omfattes likevel av begrepet alternativ behandling når det brukes metoder som i all vesentlighet anvendes utenfor helsetjenesten“ [1].

"Alternative treatment is understood to mean health-related treatment which is practiced outside the established health services and which is not practiced by authorized health personnel. However, treatment practiced within the scope of the established health services or by authorized health personnel is also covered by the term alternative treatment when the methods employed essentially are used outside the established health services” [2].

The definition of CAM applied in this thesis includes folk medicine (FM), which is commonly used in the northern part of Norway. Examples of FM in northern Norway are faith healing, herbs, blood stemming and clairvoyance. When it is necessary to distinguish between FM and other types of CAM modalities’ the terms FM and modern CAM are used.

Cancer

The term cancer refers to malignant tumors and stems from the Greek word for crab. It originally described advanced breast cancer with a central node with arms or "claws" into surrounding tissue. Cancer is characterized by disturbances in cell division, cell differentiation and tissue organization [3].
In this thesis I have not limited the studies to specific cancer sites; all cancer cases registered in the Cancer Registry of Norway (CRN) are included.
1. Introduction

Despite the fact that there were only 4–5 medical doctors practicing in Norway in the 17th century, the first legislative decree regulating quackery came in 1619, giving educated and authorized Medici exclusive rights to treat internal diseases. At the same time the church was active in preforming witch trials, forcing the people to hide their traditional medicine practices. Despite the legislative decree and the witch trials, people continued using the lay doctors as authorized medical doctors were rare [4].

In 1836, a system of district physicians was established in Norway. The first district physicians were given responsibility for enormous areas and would therefore rarely get in close contact with the people. When the districts were divided into smaller units, the physicians came closer to the local people, but treatment was expensive, causing most people to continue to use lay doctors [5]. Though this could cause conflict between the lay doctors and the medical doctors, there also existed a tolerance and even collaboration between individuals within the two systems [4]. Today, FM no longer exists as a separate medical system. However, some of the methods are still in use, also by modern CAM providers.

The introduction of modern CAM modalities in Norway started with homeopathy and acupuncture around 1860. Today numerous CAM modalities are practiced and many people use CAM as part of their cancer care even though the law continues to limit laymen’s right to treat serious illnesses.

The first known study describing CAM use in Norway was conducted by the Norwegian Gallup Institute (now TNS Gallup Norway) in 1949, where 14% of the respondents reported to have visited “what we normally call a quack doctor (chiropractor, natural doctor, wise
woman or man, etc.). Almost half of the respondents reported to believe in the effectiveness of such treatment. The study is referred to by Bruusgaard and Efskind in 1977 [6].

The first known Norwegian study regarding the use of CAM in cancer treatments was conducted in Alta, which is located in the northern part of Norway, in 1975. The study found that 42% of the respondents, more men (47%) than women (36%), had contacted a traditional healer, and that most of them (79%) experienced good results from the treatment. Most respondents stated they would use such treatment if they had a serious illness (69%) or if they were terminally ill, suffering, for example, from cancer (77%) [7].

On the basis of the Alta study, a new, national study was conducted in 1977. The study found that 84% of the respondents believed that certain illnesses could be healed by herbs, homeopathy, or spiritual/religious healing, while one out of five (19%) had used such treatment themselves. More than half of the respondents (63%) reported they would use such treatment if they were terminally ill. No major differences in gender or age were found, only regional differences: While spiritual and religious healing were the modalities mostly used in the northern part of Norway, herbal medicine and homeopathy were the most commonly used practices in the rest of the country. Furthermore, low family income was associated with the use of, and belief in, religious healing, while higher education was associated with little faith in most CAM modalities, especially religious healing [6].

Several studies of CAM use in the general Norwegian population have subsequently been conducted, investigating both general use of CAM and use of a CAM provider. The first studies were part of the health surveys performed by Statistics Norway, investigating people’s use of a CAM provider (chiropractor, homeopath and other provider) during the 14 days prior to responding to the survey [8]. Reported use was 0.4% in 1975 [4, 8, 9]. In 1985
the study was repeated, finding that 1.6% had seen a CAM provider during the previous 14 days, where the definition of CAM provider had been expanded to include acupuncturist, reflexologist and natural healer [9, 10]. Ten years later, in 1995, 13% of the people surveyed were found to have seen a CAM provider during the preceding 12 months [11]. Similar use was found in 1997 [4] when one third of the respondents in addition reported to have *ever used* a CAM provider [4, 12]. In Sweden and Denmark, a higher proportion of respondents reported to have seen a CAM provider both in the preceding 12 months and sometime previously [12]. The most recent study on CAM use in the general population was conducted in November 2012 by NAFKAM reporting overall use of CAM and use of a CAM provider to be 45.3% and 36.6% over the last 12 months [13].

In addition to these studies drawn from a national sample, regional studies have been conducted in Nord-Trøndelag (HUNT) and in Tromsø (the Tromsø cohort study). In Nord-Trøndelag, visits to a CAM provider were studied in 1997 and 2008. These studies found the proportion of respondents reporting to have used a CAM provider during the preceding 12 months to be 9.4% in 1997 and 12.6% in 2008 [14]. In Tromsø the use of CAM was studied in the fourth (T4), fifth (T5), and sixth (T6) studies conducted in 1994/95, 2001/02 and 2007/08, respectively. The results from T5 and T6 are presented in the appendix in Papers III and IV.

Prevalence of CAM use among *cancer patients* was furthermore described in 1979, where 57% of the cancer patients at Fredrikstad Central Hospital reported to have used “natural remedies”. Most of them had used ash extract, which was highly popular at the time. Patients who had used natural remedies only once or twice were not classified as users. More women (65%) than men (50%) had used natural remedies [15]. Furthermore, positive remedy effects
were reported by 21% of the users. Use of a CAM provider (“para-medical personnel”) was reported by 13% of the respondents, of whom 5% had seen a natural doctor, 7% a homeopath and 1% an acupuncturist. Similar prevalence of use was reported among men and women [15].

Few studies can be found internationally describing CAM use among cancer patients in the 1970s. One exception is a paper from 1977 describing use of unproven cancer remedies in pediatric outpatients. They found that 8.7% (n=6) of the studied population had tried unproven drugs, diets, or miscellaneous treatments [16].

In 1998, the first systematic review describing prevalence of CAM use among cancer patients internationally, found that the average prevalence of overall CAM use across all adults studied was 31.4% in the period 1977 to 1998, with results varying from 7–64% [17].

In the 1990s a series of surveys describing CAM use among Norwegian cancer patients was initiated at the University Hospital of North Norway [18-22]. These mapped the attitudes towards [18], opinions about [21], and reasons for CAM use [22], resulting in the doctoral thesis of Terje Risberg [23], which described CAM use among Norwegian cancer patients. He found that 20% of the participating cancer patients used one or more types of CAM [19], and that the estimated cumulative likelihood of being a user of CAM during the five year follow-up period was 45% [20]. Among the users of CAM, he found a greater proportion of patients with distant metastases and patients receiving palliative treatment [19].

CAM use among cancer patients was also studied in HUNT 2 and T4 in 1994–1997. In the HUNT 2 study, 16.1% of the cancer patients were found to have visited a CAM provider over the previous 12 months [24], which was a little more than what was found in T4. In
HUNT 2 the likelihood of consulting a CAM provider was associated with a university degree, low perceived global health, and recent health complaints [24].

The surveys reporting CAM use among Norwegian cancer patients up to 2004 were performed in a period were CAM providers could not legally treat cancer patients. In 2004 a new law regulating alternative treatment was implemented. This law allows CAM providers to treat people with serious diseases and disorders when the treatment takes place in cooperation with or in consultation with the patient’s physician. The law stipulates that CAM providers can also treat people with serious diseases or disorders if the sole purpose is to alleviate or moderate symptoms or consequences of the disease, or side effects of a given treatment. Treatment where the purpose is to strengthen the body’s immune system or its ability to heal itself is also further allowed [2, 25]. The passing of the law necessitated new studies in the field.

Worldwide, many studies have presented data on CAM use among cancer patients over the years. A systematic review presenting studies on CAM use in Australia, New Zealand, North America, Canada and Europe found that 49% of cancer patients used CAM; this amount ranged from 38–60% in studies conducted after 1999 [26].

The wide range in self-reported use both nationally and internationally could be due to differences in the definition of a CAM user [17, 27] and/or differences in the timeframes investigated [20]. The need for a standardized method to report CAM use is essential if comparisons of studies between cultures and periods of time are to be made reliable [17, 28]. This need for standardized ways to report CAM use, coupled with the need for an overview of CAM use among Norwegian cancer patients, led to the aim of this thesis.
2. **Aim of this thesis**

The aim of this thesis is to explore the use of CAM among Norwegian patients with a previous cancer diagnosis. To achieve this, four studies were conducted (Papers I–IV), each with its own specific aim:

1. To present a six-level model for classifying patients’ reported exposure to CAM.

2. To explore whether reported use of CAM in cancer survivors is associated with diagnostic survival prognosis.

3. To (1) examine how CAM use in cancer patients differs from people with a previous CHD diagnosis and people with no cancer or CHD diagnosis in an unselected general population and (2), investigate the use of a CAM provider among individuals with a previous cancer diagnosis.

4. To (1) describe prevalence of CAM use in individuals with a previous cancer diagnosis, and (2) to investigate whether men and women differ with regard to socio demographical and health related factors associated with CAM use.
3. Material and methods

3.1 Studied population

To ensure a valid outcome of a study, the studied population is of great importance. To avoid selection bias, the studied population needs to reflect the population we want to describe. The best way to ensure this is to study the whole population or a random sample. Self-selection of respondents might result in a studied population with a special interest for the studied topic. Such selection can also occur when the response rate in a study is low. Three populations were used in the studies in this thesis, one sample drawn directly from the Cancer Registry of Norway (the CRN study), one based on respondents that participated in the fifth Tromsø study (T5) and one based on cancer patients that participated in the sixth Tromsø study (T6).

3.2 The Cancer Registry of Norway’s study of poor prognosis (the CRN study)

In Papers I and II the included participants were cancer patients aged 20 years or older who were registered in the CRN and who were diagnosed with cancer between January 1986 and December 1997.

All patients who survived more than 5 years after diagnosis with less than 20% expected 5-year survival at the time of diagnosis were included (n=286). In addition, a random sample of all patients with a 40–60% expected 5-year survival rate at the time of diagnosis (n=599) were included. The random selection was done by sorting all patients who met the inclusion criteria (n=2716) by their personal identification number, after which the first 600 were
selected. Since the last two digits in the ID number are random, this generates a random sample. After selection of the sample, one informant was found to no longer be alive. The final sample was thus made up of 599 patients. The 885 cancer patients from the two prognosis groups were treated at 108 different hospital departments. These departments were asked to confirm the diagnosis and forward the questionnaire to the patients. 735 questionnaires were forwarded from the hospitals to the patients, of which 400 were completed and returned by mail. Three questionnaires were excluded due to missing ID number or because they were filled in by relatives, leaving us with 397 questionnaires used in the study.

It is important to note that the CRN includes all cancer patients in Norway regardless of treatment choice, place of residence, age, gender, or other socio-demographic variables.

3.2.1 The Tromsø study series (T1–T6)

The Tromsø study series started in 1974, and was initiated due to the high mortality rate of patients with cardiovascular diseases in Norway, where men in particular were affected. In the mid-1970s, 20% of Norwegian men died from cardiac infarction before the age of 75. The situation in northern Norway was even worse [29].

The survey was organized as repeated health surveys of large proportions of the population, based on the official population registry. Health screenings and self-administrated questionnaires were used to collect information. The purpose was primarily to determine the reasons for the high mortality from cardiac infarction and to develop methods for preventing cardiac infarction and stroke. As the Tromsø cohort study developed further, other disease groups were included, such as rheumatic, neurological and psychiatric disorders, skin
diseases, diseases of the stomach/bowel, cancer, and osteoporosis. The use of health services was included as an item from the fourth study (T4), including questions about CAM use.

A total of 40051 unique individuals have participated in the six studies (Table 1), of whom 15157 have participated three times or more [30].

The fifth Tromsø study (T5)

T5 was carried out in 2001-2002 with a total of 8130 men and women aged 30–89 years participating. Two groups of individuals were invited. The largest group consisted of 6185 men and women attending the extended special study in T4 and who were still residing in Tromsø. A smaller, random group of 1916 men and women was included as part of a nationwide health survey of people aged 30, 40, 45, 60 or 75 years [31]. In addition, 29 people were included as they met uninvited to the health screening and fulfilled the inclusion criteria. 8040 of the 8130 included participants had given informed consent at the time the data presented in Paper III was analyzed.

1 The number of respondents who have provided consensus varies over time and can therefore result in different numbers of participants at different points of time.
The sixth Tromsø study (T6)

T6 was carried out in 2007–2008 and was the first Tromsø study after the new law regulating CAM providers’ right to treat serious diseases and disorders was implemented in Norway. 19762 individuals were invited from four different groups:

1. All participants attending the extended special study in T4 and who were still residing in Tromsø
2. All citizens of Tromsø aged 40–42 and 60–87.
3. A 40% random sample of citizens of Tromsø aged 43–59
4. A 10% random sample of citizens of Tromsø aged 30–39

The response rate (65.7%) was lower than in previous Tromsø studies. Of those who completed the questionnaire, the response rate was higher for women (68.4%) than men (62.9%) [32]. The study thus consisted of 12984 respondents, of whom 12982 had given informed consent at the time the data presented in Paper IV was analyzed. Eight hundred respondents were registered with a cancer diagnosis in the CRN of whom 630 answered the three questions concerning CAM use and included in the analyses.

3.2.2 Chronology of the questionnaires used in the thesis

Data for the papers in this thesis are collected over a period of seven years, between 2001 and 2008, as described in figure 1 below.
3.3 Study design

In order to study CAM use among cancer patients, we have chosen an epidemiological approach.

Common epidemiological approaches are case-control, cross-sectional, and cohort studies, all observational in nature. In addition, some epidemiological studies are interventional.

Case-control studies are used to compare patients who have a disease or outcome of interest (cases) with patients who do not have the disease or outcome (controls). Both groups are retrospectively studied to compare how frequently the exposure to a risk factor is present in each group. This is done to determine the relationship between the risk factor and the disease. Case-control studies are observational because no intervention is attempted and no attempt is made to alter the course of the disease. The goal is to determine exposure to the risk factor of interest from each of the two groups of individuals: Cases and controls [33, 34]. The main disadvantage with case-control studies is that suitable controls can be difficult to find, and that the studies are done retrospectively with possible risk of recall bias [33].
**Cross-sectional studies** measure the prevalence of disease(s) and are often called prevalence studies. In a cross-sectional study the measurements of exposure and outcome are made at the same time. This makes it difficult to assess the reasons for associations. Data from cross-sectional studies are helpful in assessing the health-care needs in a population. Data from repeated cross-sectional surveys using independent random samples with standardized definitions and survey methods provide useful indications for trends. Valid surveys need well-designed questionnaires and an appropriate sample of sufficient size, in addition to a high response rate [34].

**Cohort studies** are used to identify the incidence and natural history of a disease by following two or more groups from exposure to outcome. If the former group has a higher or lower frequency of an outcome than the exposed group, an association between the exposure and the outcome is evident. The study can be done prospectively or retrospectively. Cohort studies enable us to calculate incidence rates and relative risk [35].

In the studies presented in this thesis several observational techniques were used. The CRN study (Papers I and II), T5 (Paper III) and T6 (Paper IV) as single studies are typical cross sectional studies. T5 and T6 are additionally part of a longitudinal cohort study. All the studies measure self-reported use of CAM, collected through five different questionnaires (Table 2). Q1 was sent and returned by mail, Q2 was enclosed in the mailed invitation to the T5 participants and returned personally to a nurse offering help if the questionnaire was insufficiently filled in. Q3 was handed out directly to the participants as they attended the health screening where they delivered Q2, and was completed either onsite or at home and returned by mail. Q4 and Q5 were administered in the same manner as Q2 and Q3.

The questions were mostly closed-ended with several linguistic answer options to choose from. There were two exceptions: One open-ended question in Q1 that was optional for the respondents to respond to, and a ratio scale in Q5 with numbers only.

In contrast to participant observation, we were unable to directly observe the CAM use among cancer patients, only data based on self-reported use from a retrospective perspective was collected. There are some possible sources of errors in this method that will be discussed under bias considerations.

3.3.1 Questionnaires

Questionnaires are commonly used in surveys. Both self-administrated questionnaires answered anonymously and questionnaires administered by an interviewer are common. The possibilities to reach people in their own homes and in a large geographical area with limited recourses, are two advantages of self-administrated questionnaires mailed to the respondents. The possibility to answer anonymously increases the chance for valid answers, especially when sensitive topics are addressed. It has been challenging to collect responses to surveys on CAM use among cancer patients in Norway as providers treating cancer patients did this illegally up to 2004. Self-administrated questionnaires answered anonymously might therefore have been an appropriate tool for researching CAM use by cancer patients prior to

~ 24 ~
2004. Self-administrated questionnaires answered anonymously was used in the CRN study, the only study in this thesis where CAM use and cancer was clearly connected in the questionnaire.

A challenge when questionnaires are developed is to find the right wording for the questions to ensure a reliable answer from the respondents. Furthermore, the reply options have a considerable influence on how people answer the questions. Thus, both the wording and the reply options constitute a potential challenge when the results are compared to findings in other studies.

We found, for example, that 47.1% of the respondents reported poor health in T5 (Paper III) while only 9% reported poor health in T6 (Paper IV). The differences were not likely to be found in people’s experience of their own health, but rather in how the reply options were formulated. While T5 had four categories (excellent, good, not good, and bad) T6 included a fifth category (neither good nor bad), where 38% of the answers could be found. Another example of how different wordings can give different results is the question concerning use of a CAM provider in Q2 (T5) and Q4 (T6). While Q2 asked for visits to a CAM provider without defining a CAM provider further, Q4 presented examples of CAM providers in the question. This could possibly explain the lower missing rate for the CAM provider question in Q5 (8%, n=1045) when compared to Q4 (15.9%, n=1280), as the question is clearer. Different wordings make it difficult to compare findings between different points in time as the change in reported CAM use might be due to the difference in the wording and not actual CAM use.

With a personally administered questionnaire, as opposed to a self-administrated questionnaire, there is a possibility to clarify questions for the respondent where questions
are unclear or misunderstood. This option was nevertheless offered in Q2 and Q4 where a trained nurse received the questionnaire offering help if needed.

Unlike qualitative methods like personal and focus group interviews, self-administrated questionnaires might fail to give information that could be of importance to the respondent, because it is not covered by the questionnaire. Qualitative methods could give a better understanding of why cancer patients use CAM and how they use it [36]. However, the purpose of this thesis was to describe the prevalence and association of CAM use among Norwegian cancer patients. Thus, in order to cover this aim, I found self-administrated questionnaires to be most suitable.

3.3.2 Development of the questionnaires

The first step in designing a questionnaire is to have a clear purpose of the study. The topic and the type of information you want to collect must be clear to keep the questionnaire focused. The questions must measure what they intend to measure, and the wording must be easy to understand and suitable for comparison with other studies. Most questionnaires also include socio-demographical questions such as gender, age, marital status, occupation, income, education, etc., that describe the characteristics of the participants. These demographics are often used as confounding variables during analysis. Other non-demographical questions can also be included to provide confounding variables. The length of the questionnaire must be long enough to collect the information needed, and short enough to keep the respondent focused when completing the questionnaire [37].

Once the intention is clear and the questions formulated, it is necessary to address the answer alternatives. Open-ended and closed-ended questions might be used. Open-ended questions allow the respondent to answer the question in his or her own words. Such information may
be more complete and accurate than information obtained with a more restricted question format. However, if the respondent does not accurately understand what is being asked, the researchers might end up with an answer that does not provide the information needed.

Another drawback with open-ended questions is that summarizing data can be difficult. The researcher must decide how to classify different answers, which increases the risk of misclassifications [37].

A restricted question with clear alternatives for the answer is another possibility, where alternatives are provided in a logical order [37]. This can be illustrated by one of the questions from Q5:

How do you in general consider your own health to be?

☐ Very bad

☐ Bad

☐ Neither good nor bad

☐ Good

☐ Excellent

This type of question could also be set up with numbers rating from 1–5 after each question, indicating that the answers go from very bad health (1) to excellent health (5) in an ordinal scale.

This example also illustrates another issue that must be considered: The “middle alternative” (neither good nor bad) does not force people to decide whether or not their health is mostly good or mostly bad. 10–20% of respondents tend to choose the middle alternative when this
option is offered in a forced choice attitude item [38]. In Q5 as many as 37.6% of the cancer survivors chose this option.

Another issue that must be addressed is the possibility of offering a “Don’t know” (DK) alternative. Before including this, it is important to determine whether the respondent can identify with one of the given options or not [38]. In questions where the respondent has an option, the DK question could preferably be left out to ensure that the respondent tries to give an answer that is useful for the study. The questionnaires used in this thesis only occasionally include DK options.

An alternative to boxes or numbers to tick off after or before the question, is the use of visual scales. Such scales can be provided with or without numbers and labels, and the scale can vary from few (for example 1-5) to many (1-100), labeled or not, or a combination of both. The scales can be placed horizontally or vertically:

```
Very bad                      Excellent
__________________________
|__________________________|
1          2          3          4          5
```

Scales with specific numbers and labels connected to the numbers often work like a question with closed answers. An open line, on the other hand, allows the respondent to mark the line exactly where he or she feels he/she belongs independently of linguistic interpretation. When coding a scale with no numbers, a marker with values can be placed over the line later to show what “value” the respondent has ticked off.

In T6, self-reported health was measured both with a closed-ended question as mentioned above, and with a vertical rating scale numbered 0–100. The closed-ended question was used
in Q4, which was completed by the respondents before the health screening, including also the question regarding visits to a CAM provider. The rating scale was placed in Q5, which respondents completed after the health screening together with the use of OTC products and CAM techniques questions.

The reported proportion of CAM users in relation to self-reported health might have been somewhat different if the scale had been used instead of the closed-ended questions. When the two health questions were compared by transforming values from the scale into equally numeric-sized categories (0–20: Very bad, 21–40: Bad, 41–60: Neither good nor bad, 61–80: Good, 81–100: Excellent), the respondents were found to, in general, illustrate their health with a number on the scale placing them in a better category than the category they picked themselves, as illustrated in table 3 below.

Table 3. Self-reported health in T6: Scale responses compared to category responses.

</table>
This raises a methodological concern as the respondents’ self-reported health might have been reported to be better if the health scale had been used rather than the close-ended question.

The differences can thus be due to the nature of the measurement, as discussed above, or due to the fact that the scale was placed in the second questionnaire, which was filled in after the health screening. This is because the health screening results might have adjusted the respondents’ impression of their own health.

One open-ended question was placed in Q1, asking for further information about issues experienced as meaningful in coping with cancer. Very few respondents (20 out of 400) answered the question and the question has not been analyzed.

When a questionnaire is fully developed, a pilot study testing the questionnaire might be useful. Q1 was tested in a pilot study with a test-retest and an interview after the questionnaires were filled in: Identical questionnaires were sent twice (two weeks apart) to five cancer survivors outside the study, while the interview was conducted with two of the test-persons. No major discrepancies were found between the first and the second completion of the questionnaire or between the interview and the questionnaire.

**Development of the questionnaires used in this thesis**

This thesis is based on five different questionnaires (Table 2). Q1, used in Paper I and II, was fully developed by me and is described in Paper II. Q2 and Q3 used in Paper III, and Q4 and Q5 used in Paper IV, were developed as a cooperation project where the aim was to organize a joint collection of data to be used by several research groups [39].
4. Summary of study results

4.1 Paper I: Use of complementary and alternative medicine among patients:

Classification criteria determine level of use

Background: Self-reported use of CAM among cancer patients varies widely between studies, possibly because the studies’ definitions of CAM-users are not comparable. This makes it difficult to compare study results. The aim of this study was to develop a model to classify patients’ use of CAM according to intensity of use.

Methods: A six-level model for reporting CAM use among cancer patients was developed. The levels included more than three visits to a CAM provider (level 1), one to three visits (level 2), use of OTC products/CAM techniques (level 3), use of diet (level 4), use of exercise (level 5) and use of prayer (level 6) as treatment in a cumulative manner according to involvement of use.

Results: By applying the model to responses given by Norwegian cancer patients, we found only 11.1% reporting CAM use when CAM was defined as four or more visits to a CAM provider. This proportion increased to 72.3% in the same patient group when the use of OTC products/CAM techniques, special diets, and physical exercise were also included as CAM use.

Conclusion: We recommend that future studies of CAM use among cancer patients clarify the intensity level of CAM use on which the report is based.
4.2 Paper II: Do cancer patients with a poor prognosis use complementary and alternative medicine more often than others?

Background: One circumstance under which cancer patients use CAM is when their cancer cannot be cured by conventional therapy. The aim of this study was to explore whether use of CAM is associated with survival prognosis in long-term survivors of cancer.

Methods: Two groups of cancer patients who were alive 5 years or more after diagnosis were included in the study: Those with less than 20% expected five-year survival at the time of their diagnosis, and those with a similar 40–60% expected survival rate. 735 patients received a four-page postal questionnaire about CAM use, of which 397 were returned by mail (response rate=54%).

Results: The results are reported at five levels of CAM use (levels 1–5 in the model presented in Paper I). The poor prognosis group reported CAM use more often than the better prognosis group, however only significantly higher at CAM level 2 (use of a CAM provider, p=0.021) and in use of self-support/CAM techniques (p<0.001). In terms of the patients’ use of OTC products and diet as treatment, no significant differences were found between the groups.

Conclusion: This study supports the suggestion that the use of a CAM provider and the use of self-support/CAM techniques might be associated with poor survival prognosis at the time of diagnosis.
4.3 Paper III: Any difference? Use of a CAM provider among cancer patients, coronary heart disease (CHD) patients and individuals with no cancer/no CHD

**Background:** Although use of CAM among cancer patients has been described, prevalence of use has not commonly been compared to other disease groups in a true population sample where CAM use or cancer is not the main focus. The aim of this study was to examine whether the use of a CAM provider among cancer patients differs from CHD patients and individuals with no cancer/no CHD.

**Methods:** We performed a study using data from the T5 study to compare use of a CAM provider among cancer survivors to CHD survivors and people without a history of cancer/CHD.

**Results:** Of 331 patients with a cancer diagnosis, 7.9% reported having seen a CAM provider within the last 12 months. This did not differ significantly from neither the CHD group (6.4%, p=0.402) nor the no-cancer group (9.5%, p=0.325).

**Conclusion:** According to this study, the proportion of cancer patients seeing a CAM provider was not statistically significantly different from patients with CHD or individuals without cancer or CHD.
4.4 Paper IV: CAM use among Norwegian cancer survivors. Gender specific prevalence and associations for use

**Background:** The predictors for CAM use in whole populations and among female cancer survivors are described in the literature. Predictors for CAM use among male cancer survivors are still insufficiently studied. The associations for CAM use is only occasionally differentiated by gender in populations where both male and female cancer survivors occur. The aim of this study was to describe prevalence of CAM use among individuals with a previous cancer diagnosis and to investigate gender differences with regard to factors associated with use.

**Methods:** A total of 12982 men and women aged 30 to 87 in the county of Tromsø, Norway, filled in a questionnaire developed specifically for the T6 study with questions on life style and health issues. 800 of these had a previous cancer diagnosis, of whom 630 answered three questions concerning CAM: Use of a CAM provider, use of CAM techniques, and use of OTC products within the last 12 months.

**Results:** A total of 33.8% of all cancer survivors reported CAM use, 39.4% of the women and 27.9% of the men (p<0.01). The relationship between the demographic variables and being a CAM user differed significantly between men and women with regard to age (p=0.03), education (p=0.04), and income (p<0.01). Female CAM users were more likely to have a university degree than the non-users, while male CAM users were more likely to have a lower income than the non-users.

**Conclusion:** According to this study prevalence and associations for CAM use differs significantly between women and men with cancer.
5. **General discussion**

In the studies included in this thesis I have found that CAM use among cancer patients is common, and more so among women than men. Furthermore, I developed a model to clarify degree of CAM involvement that enables comparison of CAM use across cultures. Lastly, I found the associations for CAM use are different among men and women.

5.1 **Bias considerations**

In order to study CAM use among Norwegian cancer patients, quantitative research methods was used with five different self-administrated questionnaires. Using the collected responses based on linguistic phrases, we investigated what people report to have done in the past or at present and categorized their experience into numbers suitable for statistical analyses. In some cases the respondents categorized their experience into a numbers themselves, and thus there is a risk that different people categorized the same experience into different categories/numbers, as illustrated in Table 3. The use of qualitative research methods might have given more detailed information about the respondents and reduced the risk for misclassification dependent on different categorizations from experience to categories/numbers. The chosen research method, on the other hand, strengthened the ability for generalizability of the findings. To determine the validity of the studies included in this thesis, internal validity, external validity and generalizability is considered [40].

5.1.1 **Internal validity**

Internal validity can be classified into three categories: Confounding, selection bias, and information bias [40].
Confounding

When a presumed causal relationship between two variables is fully or partly caused by a third factor, we call this confounding variables [41]. This is an important issue in observational studies [40] as the differences between the two groups could be due to other variables than the studied ones. Paper IV has, in accordance with the general literature [19, 27, 42-44], shown that the female gender and younger age are associated with being a cancer patient and at the same time a user of CAM. These two variables can therefore be seen as possible confounding variables when studying the association between being a cancer patient and CAM use. As shown in Paper II and elsewhere in the literature [45], poor survival prognosis could also possible be a confounding variable for CAM use in cancer treatments. When confounding variables were suspected in the studies presented in this thesis, analyses adjusted for, or stratified by, these factors were presented.

Selection Bias

The best way to avoid selection bias is to invite the entire background population to participate, as was done with the poor prognosis group in the CRN study referred to in Papers I and II. When this is not possible, a random sample is a good way to ensure that the studied population reflects the background population, as done in T5, T6 [46, 47], and in the “better prognosis group” in the CRN study.

A common source of selection bias is self-selection. Self-referral of subjects is ordinarily considered a threat to validity because the reasons for self-referral may be associated with the outcome of the study [48]. None of the populations used in the studies in this thesis are based on self-selection.
Low response rate is also a challenge to the validity of the findings. Papers I and II are based on a study with only a 54.4% response rate. This is a challenge to the generalizability of the findings. The clear purpose of the study might have led to an overrepresentation of CAM users among the respondents. This is suspected because the reported use of CAM was higher among the respondents answering the questionnaire before the reminder, compared to those responding after the reminder was sent out. The respondents did not differ from the non-responders with regard to age and gender.

The response rate in T5 and T6 was 77.6% and 65.7%, respectively. The high response rate in these two studies strengthens the validity of our findings, though the non-responders could have qualities that differ from those found in the studied population. The non-responders were found to be younger and the proportion of men tended to be higher than among those that responded. Non-responders also tended to be unmarried: In T6, 59% of the respondents were married while only 41% of the non-responders were married. This was found in all age groups [46]. However, we found no differences in CAM use between married and unmarried respondents. Information about age and gender distribution is described at the official T6 website [32].

**Information bias**

When the groups to be compared in a population have been identified, information about them must be collected and used in the analysis. Bias in estimating an effect or exposure can be caused by measurement errors in the needed information. Such bias is often called information bias [40].

There are two types of information bias: Differential and non-differential. Non-differential errors produce findings that are too high or too low in approximately equal amounts in the
studied groups. Differential bias occurs when one group is more likely to over- or underestimate compared to the other groups [49]. In Q2 (Paper III), “CAM provider” was not defined. This could have led to a misclassification of certain types of treatment as CAM and placed a non-CAM user in the CAM user category. This is not likely to be differential between the groups compared. Also, self-reported cancer was shown to not always coordinate with cancer registered in the CRN (Paper III), causing a potential risk for being misclassified as a cancer patient. To avoid misclassification concerning cancer, self-reported cancer was controlled towards the CRN in Paper III. In Papers I, II and IV the CRN was used as the only source.

Information bias can also occur when the recall time is long, and is referred to as recall bias. When CAM use is reported internationally the terms “ever used”, “used since diagnosis”, “used the last 12 months”, and “current use” have been seen [50]. In T5 and T6, CAM use within the last 12 months was applied in accordance with Quant et al.’s suggestion [50]. In the CRN study, on the other hand, use since diagnosis was measured in a population who had been diagnosed at least five years previously. This can cause severe challenges regarding recall, but I believe this was reduced by the provided check-list for the respondents. The fact that the cancer diagnoses in both groups were severe also makes it less likely to be differential between groups.

The ability to remember a former illness can also influence potential recall bias. This is a possible reason for the 47 respondents in T5 presented in Paper III, who ticked “no” for cancer despite a cancer diagnosis in the CRN.

Differential recall is a potential source of misclassification when two groups with different backgrounds are compared. A person with a health problem might be more likely to
remember health related issues in a more accurate way than people without a health problem [49, 51]. This possible differential recall can occur when CAM use among cancer patients is compared to CAM use in a healthy population, as in Paper III. I believe though, that this might have been reduced by the rather short recall time (12 months) concerning use of CAM.

Another possible source of information bias is that the new role as a research participant can create a change in the participants’ attitude. This change can be grouped into the following three categories: The cooperative attitude, the defensive or apprehensive attitude, and the negative attitude [52]. In voluntary studies a positive or defensive attitude is most common. The cooperative attitude is characterized as a strong desire to please the researcher; to perform well with a desire to be positively evaluated by others [37].

One example of this could be if the survey is performed by an oncologist and the cancer patient feels uncomfortable about having contacted a CAM provider, and therefore denies this in the survey. Or the opposite can occur: The patient might feel that CAM treatment should be part of standard cancer care and may therefore add extra CAM treatments to the survey to express their support for CAM. Perhaps have the treatments already been used, but not within the time frame asked for. These two scenarios can lead to over- or under estimation of CAM use, but are not likely to be differential between groups in the papers in this thesis. However, when the purpose of the study is not clear to the respondent (e.g., CAM use in cancer treatment), as in T5 and T6, or full anonymity is secured, as in The CRN-study, this less likely to be a problem.

5.1.2 External validity and generalizability

External validity refers to when the results found in a sample represent the situation in the population the sample has been extracted from. Generalizability expresses whether results
found in one population can be true for other populations. In this thesis I studied CAM use in different cancer populations. The question is whether these studies reflect CAM use in other cancer populations than the ones studied here.

In the CRN survey, one of the studied groups was the whole population of “cancer survivors with poor survival prognosis at the time of diagnosis” which strengthens the generalizability of the findings. The finding of higher use of CAM in the poor prognosis group is in addition in accordance with findings in other studies [53]. The level of CAM use among Norwegian cancer patients is not necessarily transferable to other countries as the legislation concerning CAM use varies widely between countries [54]. The prevalence of CAM use in T5 and T6 is, however, in accordance with findings in other parts of Norway [24], and the population of Tromsø reflects the population of Norway, though somewhat younger [55].

5.2 Reliability

Reliability is the ability of a measure to produce the same or highly similar results on repeated administrations. The reliability of a questionnaire relates to the consistency of responses across retesting with the same or equivalent instrument [37].

Repeated testing is the oldest and most conceptual way to establish the reliability of a questionnaire [37]. The time between the tests must be short enough to ensure that the underlying condition is unaltered and long enough to ensure that the respondents do not remember their first answer(s). The test–retest was used to determine the reliability of Q1, which was used in Papers I and II. No major discrepancies were found between the first and second administrations of the questionnaire, strengthening the reliability of the questionnaire.
The Tromsø study was developed as a cohort study that used experience from former parts of the cohort study to ensure reliability of the questions. However, the questionnaires used in T5 and T6 have not been tested as though they were a single study, which constitutes a potential reliability risk.

5.3 Gender differences

Gender differences in health issues is not a new topic. “Women suffer – men die” [56] discusses a variety of gender-specific health issues. Men less often use primary health care or report to have a health problem when compared with women, and do not fall as easily out of work [56]. This can be associated with findings of lower CAM use among men than women in Papers I–IV. There are both biological and sociological explanation models of why women and men behave differently.

Medhus claims that the testosterone and the estrogen hormone affect the fetus in a way that creates a male brain and a female brain while still in the womb. He claims among other things that boys are more focused on technical things than girls [57]. While Medhus explains the differences purely with hormones, Nielsen and Rudberg claim that boys and girls are treated differently from early childhood, which creates typical gender specific behavior [58]. West and Zimmerman argue for a more complex relation between social and physical features. Their "doing gender" refers to performing complex societal activities of perception, interaction, and micro politics in order to define certain activities and pursuits as masculine or feminine [59].

Medhus’ characterization of men as being technical can shed light on the lower use of CAM among men with cancer found in Papers I-IV. If the average man is more technically
focused, he might be more likely to see the body as a technical instrument that needs to be fixed if it is broken. This kind of treatment might be easier to find within conventional health care than in most CAM modalities.

West and Zimmerman’s [59] explanation of activities being masculine or feminine might have an influence, as health complaints and CAM use might possibly be seen as feminine and therefore avoided by men. This theory correlates with Christie who claims that the patient’s role is more like a traditional female role than a male role [60]. These studies, along with Bakketeig’s study [56] referred to above, can explain the lower use of CAM among men in Papers I-IV.

The reason for the discrepancy concerning use of health services like CAM might be explained by the fact that men often have a wife who cares for them if they do not feel well. Women, on the other hand, often lack this caregiver even though they live in a relationship with men and therefore need to share their concerns other places [60]. Furthermore, if health care can be categorized as a feminine rather than a masculine activity this is also reflected in the colored press. Health problems and CAM use are more often addressed in magazines for women than for men, and mass media is pointed out as one of the sources of information for women with breast cancer in a recent systematic review [61]. This again leads to a higher exposure for women than men, which can explain the more active use of CAM among women.

When associations for CAM use were addressed, we found in some cases that men using CAM tended to be more similar to women using CAM than the male non-users of CAM (i.e., income and education, Paper IV). When it came to age and self-reported health, women using CAM tended to be younger and with better self-reported health than men using CAM.
This might indicate that men, contrary to women [62], use CAM as a specific treatment for their disease more than for prevention and well-being. This is supported by the findings showing that men with metastatic cancer are more likely to use CAM than men with no metastatic cancer [63].

The gender aspect is also relevant in regards to cancer sites. While breast cancer is the most common cancer site among women, prostate cancer is most common among men [64]. A study of men with prostate cancer indicated that they prefer to avoid disclosure about their illness due to a low need for support and a wish to sustain a normal life without being stigmatized by others [65]. These findings are supported by Harrison who found that men shared their concern with mainly one person while women shared it in a wide circle of family, friends, and their partner [66]. A man with prostate cancer reported that the reason he would not share this information with a friend who thought he was going to get prostate cancer: “It’s none of his damn business” [65]. As CAM is not offered within conventional health-care in Norway, many patients receive information about CAM use by talking to others. If men are more reluctant to discuss their cancer with others than women are, they are also likely to receive less information about CAM modalities for cancer. This, in addition to the less expressed need for support, might partly explain the lower use of CAM among men found in Papers I-IV.

5.4 Use of a model for reporting CAM use

A model has in principle the same function as a theory. While a theory provides a simplified picture of reality in words, a model uses a graphical representation. Like a theory, a model
consists of two main components: Concepts and relationships between concepts; it is a schematic presentation of terms and theories.

*One or more terms*

+ The relationship between the terms

= A model

As with theories, models classify and abstract the information to make it easier to distinguish between the important and unimportant information. In social science it is common to distinguish between three different models:

*Descriptive models* describe a relationship or a phenomenon—how factors relate. *Models to understand and explain a phenomenon* provide an understanding and explanation. *Normative models* provide advice about how to act [67].

The main advantage of models is that they simplify and make the data more easily accessible. The main limitations are that there will always be data that do not fit into the model and the richness of the data may disappear. The model described in Paper I was developed for two purposes:

1. To be able to compare studies across cultures.

2. To categorize involvement of CAM use.

Developing a model for reporting CAM use in a population was necessary in order to compare studies across cultures as the definition of a CAM user varied widely [17]. As described in Paper I, some models were already in use. What was needed was a simple model that published studies could fit into; a model that could work across cultures and also measured the CAM involvement. From my point of view, as a CAM provider, it seemed
essential to differentiate between CAM modalities that included a CAM provider and those that were performed by the patients themselves without the guidance of a professional provider. This differentiation is important, as many studies describe the patient’s experience and effect of CAM use. It was also essential to differentiate between CAM and life-style changes like exercise and dietary changes that are also recommended by conventional health care providers. Prayer was important to both include and exclude as there is no common agreement on whether or not to classify prayer as CAM. From my point of view, prayer is not to be classified as CAM, as discussed in Paper I. Since many studies already include prayer in their definition of CAM, prayer was placed in the outer circle of the model, easy both to include and exclude. The model can be seen as both descriptive and normative as the model both describes what a CAM user can be and suggests how CAM use should be reported in future studies.

Four years after the model was published, it has been referred to by several publications on CAM use [50, 68-74] and used as a model to present data on CAM use at least once [68]. The model has also served as a basis for a new questionnaire (I-CAM-Q) [50].
6. Conclusion

6.1 What does this thesis add?

I developed a six-level model for classifying patients’ exposure to CAM that enables studies to be comparable across cultures. When studies were placed in the model and compared with other studies presenting data at the same level, the reported use of CAM among cancer patients was found to be more similar across cultures than first expected.

Cancer survivors in Norway do not differ significantly from people with CHD with regard to prevalence of CAM use. Cancer patients with a poor prognosis seem to be more frequent users of some CAM modalities than patients with a better prognosis.

Associations for CAM use differ statistically significantly between men and women. Female CAM users are younger, better educated and have a higher income than non-users. Male CAM users do not differ significantly from their non-user counterparts except in terms of income, where they, contrary to women, tend to have lower income than male non-users.

6.2 Future research

Studies following patients over time, starting at the first diagnosis of cancer, are still missing in this important research area. This could provide more knowledge about CAM use among all cancer patients, not only retrospectively among the survivors with potential recall bias. We also need qualitative studies to better understand the mechanisms behind the choice of using CAM, with a special focus on gender-specific and other socio-demographic factors.

Information letters to the hospitals
Kjære kollega

I følge flere publikasjoner av overlege dr. med. Terje Risberg ved kreftavdelingen, Universitetssykehuset i Nord-Norge (UNN), oppsøker omlag 45 % av alle kreftpasienter alternativmedisinsk behandling en eller flere ganger i løpet av sin kreftsykdom (Risberg et.al.1998).

Nasjonalt forskningssenter innen komplementær og alternativ medisin (NAFKAM) har i samarbeid med Kreftrегистret igangsatt en undersøkelse om bruk av alternativ medisin blant to grupper kreftpasienter identifisert i Kreftrегистret. Faktisk bruk av alternativ medisin skal kartlegges hos pasienter som har overlevd 5 år eller mer etter påvist kreft. I studien vil disse deles i to grupper. En hovedgruppe bestående av kreftpasienter med en utgangsprognose på mindre enn 20 % sjanse for 5 års overlevelse, og en kontrollgruppe med en utgangsprognose på 40-60 % sjanse for 5 års overlevelse etter påvist kreft. Alle pasientene som er trukket ut til å delta i studien er i live per dags dato. Et eksempel av forskningsprotokollen kan hvis ønskelig fåes ved henvendelse til NAFKAM (nafkam@fagmed.uit.no).

Kreftrегистret presiserer at henvendelser til pasienter skal gå gjennom behandlende lege. Vi vil derfor be dere om å videresende den/de vedlagte konvolutt(ene) (et åpent prøve-eksemplar ligger vedlagt) bestående av et følgebrev, et firesiders spørreskjema og en ferdig frankert svarkonvolutt til de av pasientene i vår utvalgsgruppe som tilhører ditt sykehus. Samtidig vil vi be dere stemple utsendelseskonvoluttonen med ditt sykehus’ stempel. Når spørreskjemaene er sendt ut til pasientene, ber vi dere returnere vedlagte svarsending til oss med opplysninger om når skjemaene er sendt ut. Det gir oss oversikt over hvilke pasienter som har fått skjemaet og når de har mottatt det. Det må være helt sikkert at pasienten er informert om sin kreftsykdom.

Studien er tilrådd av etisk komité og personidentifiserbare opplysninger om pasienten vil kun foreligge i Kreftrегистret. NAFKAM vil kun arbeide med ikke-personidentifiserbare data.

Vi håper på deres positive bidrag til denne viktige studien og at dere videresender dette så snart som mulig. Vi imøteser deres svar på vår henvendelse.

Med vennlig hilsen

Frøydis Langmark

Kjære kollega!

Først vil vi benytte anledningen til å takke for at avdelingen i fjor høst sendte ut brev til pasientene som var trukket ut til deltagelse i undersøkelsen om bruk av alternativ medisin blant to grupper kreftpasienter identifisert i Kreftregisteret. Faktisk bruk av alternativ medisin kartlegges hos pasienter som har overlevd 5 år eller mer etter påvist kreft. Et eksemplar av forskningsprotokollen kan hvis ønskelig fjæs ved henvendelse til Nasjonalt forskningssenter innen komplementær og alternativ medisin (NAFKAM) (nafkam@fagmed.uit.no) ved universitetet i Tromsø. Etter første utsendelse har vi fått svar fra 43% av pasientene. Vi har fått mange positive tilbakemeldinger fra de som svarte. Det var fra etisk komité gitt tillatelse til å sende ut én gjentatt henvendelse til de pasientene som ikke svarte på første henvendelse. På grunn av at responsraten er såavidt lav at det svekker utsagnskraften i undersøkelsen, vil vi gjøre gjøre en ny henvendelse til pasientene, slik at undersøkelsen blir så representativ som mulig. Alle pasienter som vi nå gjør henvendelse om er i live per dags dato. Kreftregisteret presiserer at henvendelser til pasienter skal gå gjennom behandlende lege. Vi vil derfor be dere om å videresende den/de vedlagte konvolutt(ene) (et åpent prøve-eksemplar ligger vedlagt) bestående av et følgdebrev, et firesiders spørreskjema og en ferdig frankert svarkonvolutt til de av pasientene i vår utvalgsgruppe som tilhører ditt sykehus. Samtidig vil vi be dere stempel utsendelseskonvolutten med ditt sykehus’ stempel. Når spørreskjemaene er sendt ut til pasientene, ber vi dere returnere vedlagte svarsending til oss med opplysninger om når skjemaene er sendt ut. Det gir oss oversikt over hvilke pasienter som har fått skjemaet og når de har mottatt det. Vi presiserte sist at det måtte være helt sikkert at pasienten var informert om sin kreftsykdom. I et par tilfeller fikk vi tilbakemelding om at pasientenes antatte kreftsykdom var en feildiagnose. Vi er meget takknemlige for de tilbakemeldingene. Det burde, på bakgrunn av dette, ikke være nødvendig med en ny gjennomgang av pasientenes journaler, og vi antar at brevene kan sendes ut direkte.

Studien er tilrådd av etisk komité og personidentifiserbare opplysninger om pasienten vil kun foreligge i Kreftregisteret. NAFKAM vil kun arbeide med ikke-personidentifiserbare data.

Vi håper på deres positive bidrag til denne viktige studien og at dere videresender dette så snart som mulig. Vi imøteser deres svar på vår henvendelse.

Med vennlig hilsen

Appendix 1-B:

Information sent to the patients
Forespørsel om å delta i forskningsprosjekt

**LIVSSTIL FØR OG ETTER KREFTDIAGNOSE**

Det er kjent at mennesker som får kreft tidvis oppsøker behandling og gjennomfører livsstilsendringer som går utover det det norske helsevesenet normalt tilbyr. Hensikten med denne studien er å kartlegge hvor stor andel av kreftpasientene som rent faktisk gjør dette. Hvis du ønsker å delta i denne studien, vil vi be deg svare på det vedlagte spørreskjemaet og returnere det til oss i den ferdig frankerte svarkonvolutten. Det vil ta cirka 10 minutter å svare på spørreskjemaet. Svarene dine kan hjelpe oss til å få en bedre forståelse av i hvilken grad personer med kreft endrer livsstil og benytter seg av behandlingsformer tilbudt utenfor det etablerte helsevesenet, og hvilken nytte de selv opplever å ha hatt av slik behandling. Hvis du ikke ønsker å delta i studien trenger du ikke å foreta deg noen ting.

Det gis ingen godtgjørelse for deltagelse i denne studien.

Kun forskningsleder og forskningsmedarbeider vil ha tilgang til skjemaene. Når studien er avsluttet vil skjemanummeret bli slettet og dataene vil ikke lenger kunne kobles til enkeltpersoner. Opplysninger i eventuelle rapporter vil heller ikke kunne tilbakeføres til enkeltpersoner.

Deltakelse i studien er frivillig. Dersom du ikke ønsker å delta i studien trenger du ingen begrunnelse for det og det får ingen konsekvenser for deg om du ikke samtykker i å delta.

Samtykke til å delta i studien gir du ved å fylle ut det vedlagte spørreskjemaet og returnere det i den ferdig frankerte svarkonvolutten som ligger vedlagt. **Undersøkelsen består kun av dette ene spørreskjemaet.**

Med vennlig hilsen

Vinjar Fønnebø, prosjektleder
Professor dr.med.

Hvis du har spørsmål om prosjektet, er du velkommen til å ringe eller skrive til prosjektmedarbeider, stipendiat Agnete Egilsdatter Kristoffersen eller prosjektleder, professor Vinjar Fønnebø, telefon 77646650.
Forespørsel om å delta i forskningsprosjekt

**LIVSSTIL FØR OG ETTER KREFTDIAgnose**

Dette skjemaet sendes til deg fra din behandlingsinstitusjon. Kreftregisteret registrerer årlig rundt 20 000 nye tilfeller av kreft. Alle krefttilfeller, både alvorlige og mindre alvorlige skal meldes inn og registreres i Kreftregisteret. Her finnes derfor alt fra ondartede hudlidelser med meget gode utsikter til helbredelse, til mer alvorlige kreftformer.

Det gis ingen godtgjørelse for deltakelse i denne studien.

Forskningsledelsen har bare kjennskap til nummeret på vedlagte spørreskjema og dette er kun for å sjekke at brevet er sendt til deg. Kun forskningsleder og forskningsmedarbeider vil ha tilgang til skjemaene. Når studien er avsluttet vil skjemanummeret bli slettet. Opplysninger i eventuelle rapporter vil heller ikke kunne tilbakeføres til enkeltpersoner.

Samtykke til å delta i studien gir du ved å fylle ut det vedlagte spørreskjemaet og returnere det i den ferdig frankerte svarkonvolutten som ligger vedlagt. **Undersøkelsen består kun av dette ene spørreskjemaet.**

Med vennlig hilsen

Bakgrunnsinformasjon om deg:

1) Er du □ Mann □ Kvinne

2) Hvilket år er du født? 19________

3) Hva er din sivilstand i dag?
□ Enslig
□ Gift / samboende / registrert partner
□ Skilt / separert
□ Enke / enkemann

4) Hva er din høyeste fullførte utdannelse?
□ Mindre enn 7-årig folkeskole
□ 7-årig folkeskole
□ Ungdomsskole / Realskole
□ Videregående skole / Gymnas / yrkesfaglig utdanning
□ Høyskole / Universitet inntil 4 år
□ Høyskole / Universitet mer enn 4 år

5) Da du fikk påvist kreft første gang, bodde du da (sett ett eller flere kryss):
□ Alene
□ Sammen med ektefelle/samboer
□ Sammen med egne barn
□ Sammen med andre slektninger
□ På institusjon
□ Annen boform…………………………

6) Hva var din sivilstand da du fikk kreft?
□ Enslig
□ Gift / samboende / registrert partner
□ Skilt / separert
□ Enke / enkemann

7) Hvor bodde du da kreftens ble påvist?
□ På Østlandet
□ På Sørlandet
□ På Vestlandet
□ I Trøndelag
□ I Nord-Norge
□ I utlandet, angi land:

…………………………………………………

........................................
Bakgrunnsinformasjon fortsetter:

8) Hvor mange innbyggere har stedet / byen der du bodde da du fikk kretf?
   - Færre enn 500 innbyggere
   - 500-1 999 innbyggere
   - 2 000-19 999 innbyggere
   - 20 000-99 999 innbyggere
   - 100 000 innbyggere eller mer

9) Hvordan bodde du da kretfen ble påvist?
   - På gårde
   - I eneboliger
   - I tomannsboliger / rekkehuser
   - I blokker / bygårde
   - På hybel
   - På institusjon
   - Annen boform:

   ...........................................................................

10) Da kretfen ble påvist var du da:
    - i inntektsgivende arbeid
    - hjemmeværende
    - arbeidssøkende
    - student / skoleelever
    - pensjonist
    - uføretrygd / på attføring
    - annet:

    ...........................................................................

Familiebakgrunn:

11) Hva er / var din fars høyeste fullførte utdannelse?
    - Mindre enn 7-årig folkeskole
    - 7-årig folkeskole
    - Ungdomsskole / Realskole
    - Videregående skole / Gymnas / yrkesfaglig utdanning
    - Høyskole / Universitet inntil 4 år
    - Høyskole / Universitet mer enn 4 år
    - Vet ikke

12) Hva er / var din mors høyeste fullførte utdannelse?
    - Mindre enn 7-årig folkeskole
    - 7-årig folkeskole
    - Ungdomsskole / Realskole
    - Videregående skole / Gymnas / yrkesfaglig utdanning
    - Høyskole / Universitet inntil 4 år
    - Høyskole / Universitet mer enn 4 år
    - Vet ikke

13) Hva er / var din ektefelle / samboers / partners høyeste fullførte utdannelse?
    - Mindre enn 7-årig folkeskole
    - 7-årig folkeskole
    - Ungdomsskole / Realskole
    - Videregående skole / Gymnas / yrkesfaglig utdanning
    - Høyskole / Universitet inntil 4 år
    - Høyskole / Universitet mer enn 4 år
    - Vet ikke
    - Har ikke / har ikke hatt ektefelle / samboer / partner

14) Hvor bodde familien din det meste av tiden da du vokste opp?
    - På Østlandet
    - På Sørlandet
    - På Vestlandet
    - I Trøndelag
    - I Nord-Norge
    - I utlandet, angi land:

    ...........................................................................
    - Jeg flyttet hele barndommen (gå til spørsmål 17)

15) Hvor mange innbyggere hadde stedet / byen der du vokste opp?
    - Færre enn 500 innbyggere
    - 500-1 999 innbyggere
    - 2 000-19 999 innbyggere
    - 20 000-99 999 innbyggere
    - 100 000 innbyggere eller mer

16) Hvordan bodde familien din hovedsakelig da du vokste opp?
    - På gårde
    - I enebolig
    - I tomannsbolig / rekkehuser
    - I blokk / bygård
    - Annen boform:

    ...........................................................................
Bruk av komplementær- og alternativ behandling:

17) Har du mottatt en eller flere av følgende behandlinger i tiden etter at du fikk kreft (sett ett etter flere kryss)?
   - JA, følgende behandling(er):
     - Akupunktur
     - Homøopati
     - Soneterapi
     - Healing
     - Naturterapi
     - Massasje / aromaterapi
     - Samtale med psykolog, psykiater, gestaltherapeut el.
     - Religiøs helbredende som har bedt / lest for deg
     - Opphold på alternativ kreftklinikk
     - Annen behandling gitt utenfor det etablerte helsevesenet:

                    ..............................................................

NEI,
   - har vurdert denne type behandling men ikke tatt i bruk
   - har aldri vurdert slik behandling

Hvis NEI – gå til spørsmål 22

18) Hvis JA, hvor mange konsultasjoner har du hatt i alt?
   - 1-3
   - 4-8
   - 9 eller fler

19) På hvilket tidspunkt startet du denne behandlingen?
   - Jeg var allerede i gang med behandling da kreftens ble påvist
   - 0-6 måneder etter påvist kreft
   - 7-12 måneder etter påvist kreft
   - 13-24 måneder etter påvist kreft
   - Mer enn 2 år etter påvist kreft

20) Ble behandlingen benyttet:
   - parallelt med behandling på sykehus / hos lege?
   - etter behandlingen på sykehuset / hos legen var avsluttet?
   - i stedet for behandling på sykehus / hos lege?

21) Hvordan opplevde du denne behandlingen?
   - Den har hatt svært positiv effekt
   - Den har hatt litt positiv effekt
   - Den har ikke hatt effekt
   - Den har hatt litt negativ effekt
   - Den har hatt svært negativ effekt
   - Vet ikke

Kosthold:

22) Hvordan er kostholdet ditt i dag?
   - Jeg spiser som før kreftens ble påvist
   - Jeg har endret kostholdet noe
   - Jeg har endret kostholdet mye
   - Jeg har lagt kostholdet helt om

23) Har du i forbindelse med sykdommen tatt spesielle kosttilskudd / vitamintilskudd?
   - JA, (sett kryss for det du har tatt, ett eller flere kryss):
     - vanlige vitamin- og mineraltablett
     - egendefinert kur av urter og kosttilskudd
     - kur spesialtilpasset av kostveileder eller vitamin- og mineralterapeut

Ferdig kur:
   - Nitterkuren
   - Andre ferdigkurer, hvilke:

                    ..............................................................

NEI,
   - har vurdert dette, men ikke tatt i bruk
   - har aldri vurdert dette
Hjelp til selvhjelp:

24) Har du i tiden etter kreftdiagnosen (sett ett eller flere kryss):
☐ deltatt i selvhjelpsgrupper?
☐ drevet avspenningsøvelser på egen hånd?
☐ medittert jevnlig?
☐ drevet med positiv ”visualisering”?  
☐ annen form for selvhjelp / egenterapi?  
Spesifiser:

..............................................................
☐ Har ikke drevet bevisst egenterapi

Mestring:

Utsagnene nedenfor handler om hvordan du opplever og mestrer de plagene / problemene du har hatt. Sett ett kryss i den ruten som passer best slik du opplever deg selv:

27) Jeg sier i fra når jeg er sint eller trist
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

28) Jeg snakker gjerne med noen utvalgte mennesker når det røyner på  
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

29) Å gjøre nye ting er ofte vanskelig for meg
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

30) Jeg går aktivt inn for å finne en løsning på problemene mine  
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

31) Fysisk aktivitet er viktig for meg  
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

32) Jeg prøver å glemme plagene mine  
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

33) Jeg legger problemene mine bak meg ved å konsentrere meg om noe annet  
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

34) Jeg tror det kan komme noe positivt ut av problemene / plagene mine
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

35) Jeg har god tro på at plagene mine vil bli bedre
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

36) Jeg arbeider mye for å holde plagene / problemene på avstand
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

37) Jeg føler langt på vei at jeg har gitt opp
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

38) Jeg trekker meg tilbake fra andre når jeg har det vanskelig
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

39) Det betyr mer for meg hvordan jeg selv opplever min egen helse, enn hva fagpersonene rundt meg måtte mene
☐ Helt enig ☐ Nokså enig ☐ Både og ☐ Nokså uenig ☐ Svært uenig

Takk for at du svarte på spørreskjemaet!

Appendix 2:
The Fifth Tromsø Study (T5)
Appendix 2-A:

Information leaflet Tromsø V
Welcome to the fifth round of the Tromsø Study!

-a collaboration between:

Department of Community Medicine, University of Tromsø

National Health Screening Service

You will find more information about the health survey on the homepage of the National Health Screening Service

www.shus.no
Would you like to participate in the fifth survey of the Tromsø study?

Why a new round of the Tromsø study?

Large health studies were conducted in Tromsø in 1974, 1979-80, 1986-87, and 1994-95. These surveys have given us important knowledge concerning cardiovascular epidemiology and other serious diseases, such as cancer.

The main purpose of another Tromsø study is to monitor any changes in the health of the population since last survey. We will analyze the information we have about a person, both personal data and results from analysis of frozen blood, and see if there are relationships to diseases that occur. This way we learn more on how cardiovascular diseases, cancer and other major diseases develop and how they can be prevented.

Why are we asking you to participate?

We ask everyone who participated in the Special Study in the Tromsø study in 1994-95 and a selection of others older than 29 years.
What does the study include?
The Tromsø study is first and foremost a research project. Through following up as many as possible from the study of 1994-95, we gain valuable information of health and disease in the population of Tromsø.

On the day of the examination you will be guided through the survey and there will be an opportunity to ask questions. Your height, weight and waist circumference is measured, as well as blood pressure, and a blood sample is taken. Your lung capacity is determined, in addition to simple tests of vision and strength. Tests to determine osteoporosis is are also conducted.
The blood sample may later be analyzed for fatty substances, blood sugar, indicators of infections, diet, hormones, liver- and kidney function, and bone markers.

Where are you going to meet?
The survey will for the vast majority take place in Elizabeth Center in Tromsø. For some of the outer places in the municipality, the survey will take place locally. Those concerned are notified in this letter.

On the front page of the questionnaire that you receive with this letter are the opening hours for the health survey and when you have to attend the survey. If you cannot attend at that time, you are welcome any another time during the opening hours of the survey. There is no need to tell us about this — just show up when we are open.

The Questionnaires
With this letter a questionnaire is attached. We kindly ask you to complete this form at home and bring it on the day of the examination.

If you are unsure of how to answer a question, leave it blank. You will be aided at the examination.

Everyone who participates in the study will be given an additional questionnaire of other factors which might affect your health. The questionnaire is to be completed at home and sent to the National Health Screening Service in the enclosed envelope.

Future analysis of blood
The blood which is frozen will be used for medical research only, in order to find factors influencing disease. In most cases this means that data from people with a disease is compared to data from those without it. The comparison is done on already collected data and the new analysis from the frozen blood.

We might want to analyze parts of the DNA from the frozen blood cells. Because DNA is important for the regulating and development in human being, we need knowledge on DNA to understand why diseases evolve. Analysis of this kind are only conducted after the Data Inspectorate has given a permission and if The Regional Committee for Research Ethics has no objections to the analysis.
When will you receive your results?

About four weeks after you participated in the study you will receive a letter wherein your recorded values for cholesterol, blood pressure and blood sugar are stated. You will also receive more information on the different risk factors.

People who are found to be at particularly high risk of developing cardiovascular diseases and diabetes will be recommended to seek further examination from their own doctor.

---

**We need your consent**

When you attend the study, you will be asked to sign a consent form where you agree to the following six points:

- That we may contact you with recommendations of follow ups, treatment or prevention of disease.

- That you may ask you to participate in similar studies in the future.

- That we may use the results for medical research.

- That the results, after legal approval from the Data Inspectorate, may be linked with information about you in other registries, to be used for research purposes. This might be registries including information on health, pension and disease, and also data on income, education and occupation, in addition to information from previous health studies in Tromsø. Examples of such registries are the Cancer Registry, the Cause of Death registry and population censuses. In these cases your name and social security number are removed when data is analyzed.

- That the blood sample may be stored and used for medical research. All use of this sample will only take place after approval from the Data Inspectorate and if the Regional Committees for Research Ethics has no objections.

- That the blood sample may also be used for analysis of DNA.

Even if you approve to this now, you are entitled to change your opinion later and also ask to have your profile deleted from the registry. You may also decline to consent to one or more of the points above. The Data Inspectorate has given consent to this fifth survey of the Tromsø Study, and the Regional Committee for Research Ethics has no objections. We keep your results confidential and safe. Everyone employed in the Tromsø Study has signed a confidentiality agreement.
Appendix 2-B:
Declaration of consent Tromsø V
SAMTYKKEERKLÆRING

Sammen med forespørselen om deltakning i undersøkelsen, ble jeg informert om undersøkelsen. Jeg har lest/blitt forklart det informasjonen.

Jeg samtykker i at (stryk det/de avsnitt du reserverer deg mot)
1. jeg kan bli kontaktet med anbefaling om oppfølging, behandling eller for å forebygge sykdom.
2. jeg kan bli bedt om å delta i lignende undersøkelser i fremtiden.
3. resultatene minere kan brukes i medisinsk forskning.
5. blodproben min kan lagres og brukes i medisinsk forskning. All bruk av denne prøven vil bare skje etter godkjenning fra Datatilsynet og dersom den regional komité for medisinsk forskningsetisk ikke har innvendinger.
6. blodproben også kan brukes til analyse av arvestoff

1. YOUR OWN HEALTH

1.1 What is your current state of health? (Tick one only)

- Poor ........................................ 1
- Not so good ................................ 2
- Good ........................................... 3
- Very good .................................... 4

1.2 Do you have, or have you had?:

- Asthma ........................................ Yes No
- Hay fever ..................................... Yes No
- Chronic bronchitis/emphysema ......... Yes No
- Diabetes ...................................... Yes No
- Osteoporosis ................................ Yes No
- Fibromyalgia/chronic pain syndrome ... Yes No
- Psychological problems for which you have sought help .................... Yes No
- A heart attack ............................... Yes No
- Angina pectoris (heart cramp) .......... Yes No
- Cerebral stroke/brain haemorrhage ... Yes No

1.3 Have you noticed attacks of sudden changes in your pulse or heart rhythm in the last year? ........ Yes No

1.4 Do you get pain or discomfort in the chest when:

- Walking up hills, stairs or walking fast on level ground? .................. Yes No
- If you stop, does the pain disappear within 10 minutes? .............. Yes No
- Can such pain occur even if you are at rest? ......................... Yes No

1.5 If you get such pain, do you usually:

- Stop? ........................................... Yes No
- Slow down? .................................... Yes No
- Carry on at the same pace? ................................. Yes No

1.6 If you stop, does the pain disappear within 10 minutes? .............. Yes No

1.7 Can such pain occur even if you are at rest? ................. Yes No

2. MUSCULAR AND SKELETAL COMPLAINTS

2.1 Have you suffered from pain and/or stiffness in muscles and joints during the last 4 weeks? (Give duration only if you have had problems)

- Neck/shoulders .......................... No complaint Some complaint Severe complaint Duration Up to 2 weeks 2 weeks or more
- Arms, hands ..............................
- Upper part of your back ..............
- Lumbar region ...........................
- Hips, legs, feet ...........................
- Other places ............................ Yes No Age last time

2.2 Have you ever had:

- Fracture in the wrist/forearm .......... Yes No
- Hip fracture? ................................ Yes No

3. OTHER COMPLAINTS

3.1 Below is a list of various problems. Have you experienced any of this during the last week (including today)? (Tick once for each complaint)

- Sudden fear without reason .......... No complaint Little complaint Pretty much Very much
- Felt afraid or anxious ..................
- Faintness or dizziness ..................
- Felt tense or upset ........................
- Tend to blame yourself ..............
- Sleeping problems ........................
- Depressed, sad ............................
- Feeling of being useless, worthless ....
- Feeling that everything is a struggle......
- Feeling of hopelessness with regard to the future

4. USE OF HEALTH SERVICES

4.1 How many times in the last 12 months have you been to/used:

(Tick once for each line)

- General practitioner (GP) .............. None 1-3 times 4 or more
- Medical officer at work .................
- Psychologist or psychiatrist (private or out-patient clinic) ............
- Other specialist (private or out-patient clinic) ..................
- Emergency GP (private or public) ..... None 1-3 times 4 or more
- Hospital admission ........................
- Home nursing care .....................
- Physiotherapist ...........................
- Chiropactor ...............................
- Dentist ..................................... Alternative practitioner ..........................

5. CHILDHOOD/YOUTH AND AFFILIATION

5.1 How long altogether have you lived in the county? (Put 0 if less than half a year)

- Year

5.2 How long altogether have you lived in the municipality? (Put 0 if less than half a year)

- Year

5.3 Where did you live most of the time before the age of 16? (Tick one option and specify)

- Same municipality ..... 1
- Another municipality in the county .......... Which one: 
- Another county in Norway 3 Which one: 
- Outside Norway ....... 4 Country: 

5.4 Have you moved within the last five years?  

- No 1 Yes, one time 2 Yes, more than once 3

6. BODY WEIGHT

6.1 Estimate your body weight when you were 25 years old:  kg
### 7. FOOD AND BEVERAGES

#### 7.1 How often do you usually eat these foods?  
(Tick once per line)

<table>
<thead>
<tr>
<th>Fruit, berries</th>
<th>Cheese (all types)</th>
<th>Potatoes</th>
<th>Boiled vegetables</th>
<th>Fresh vegetables/salad</th>
<th>Fatty fish (e.g. salmon, trout, mackerel, herring)</th>

#### 7.8 When you drink alcohol, how many glasses or drinks do you normally drink?

<table>
<thead>
<tr>
<th>Beer</th>
<th>Wine</th>
<th>Spirits</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

#### 7.9 Approximately how many times during the last year have you consumed alcohol equivalent to 5 glasses or drinks within 24 hours?

<table>
<thead>
<tr>
<th>Number of times</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
</tr>
</tbody>
</table>

### 8. SMOKING

#### 8.1 How many hours a day do you normally spend in smoke-filled rooms?  
(Number of total hours)

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

#### 8.2 Did any of the adults smoke at home while you were growing up?  
(Number of adults)

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

#### 8.3 Do you currently, or did you previously live together with a daily smoker after your 20th birthday?  
(Number of years)

<table>
<thead>
<tr>
<th>Yes, now</th>
<th>Yes, previously</th>
<th>Never</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

#### 8.4 Do you/did you smoke daily?  
(Number of years)

<table>
<thead>
<tr>
<th>Yes, daily</th>
<th>Sometimes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

If NEVER: Go to question 9: (EDUCATION AND WORK)

#### 8.5 If you smoke daily now, do you smoke:  
(Yes/No)

<table>
<thead>
<tr>
<th>Cigarettes</th>
<th>Cigars/cigarillos</th>
<th>A pipe</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

#### 8.6 If you previously smoked daily, how long is it since you quit?  
(Number of years)

<table>
<thead>
<tr>
<th>Number of years</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
</tr>
</tbody>
</table>

#### 8.7 If you currently smoke, or have smoked previously:  
(Yes/No)

<table>
<thead>
<tr>
<th>How many cigarettes do you or did you normally smoke per day?</th>
<th>Number of cigarettes</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>How old were you when you began daily smoking?</th>
<th>Age in years</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>How many years in all have you smoked daily?</th>
<th>Number of years</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td></td>
</tr>
</tbody>
</table>

#### 9. EDUCATION AND WORK

#### 9.1 How many years of education have you completed?  
(Number of years)

<table>
<thead>
<tr>
<th>Number of years</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
</tr>
</tbody>
</table>

#### 9.2 Do you currently have paid work?  
(Yes, full-time ☐ 1 Yes, part-time ☐ 2 No ☐ 3)

#### 9.3 Describe the activity at the workplace where you have paid work for the longest period in the last 12 months.  
(e.g. Accountancy firm, school, paediatric department, carpentry workshop, garage, bank, grocery store, etc.)

<table>
<thead>
<tr>
<th>Business:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>If retired, enter the former business and occupation. Also applies to 9.4</td>
<td></td>
</tr>
</tbody>
</table>

#### 9.4 Which occupation/title have or had you at this workplace?  
(e.g. Secretary, teacher, industrial worker, nurse, carpenter, manager, salesman, driver, etc.)

<table>
<thead>
<tr>
<th>Occupation:</th>
<th></th>
</tr>
</thead>
</table>

#### 9.5 In your main occupation, do you work as self-employed, as an employee or family member without regular salary?  
(Self-employed ☐ Yes Employee ☐ No Family member ☐)

#### 9.6 Do you believe that you are in danger of losing your current work or income within the next 2 years?  
(Yes ☐ No ☐)

#### 9.7 Do you receive any of the following benefits?  
(Yes ☐ No ☐)

<table>
<thead>
<tr>
<th>Sickness benefit (are on sick leave)</th>
<th>Old age pension, early retirement (AFP) or survivor pension</th>
<th>Rehabilitation/reintegration benefit</th>
<th>Disability pension (full or partial)</th>
<th>Unemployment benefits during unemployment</th>
<th>Social welfare benefits</th>
<th>Transition benefit for single parents</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

T
10. EXERCISE AND PHYSICAL ACTIVITY

10.1 How has your physical activity in leisure time been during this last year? (Tick the most appropriate box)

Light activity
(not sweating/out of breath)...

Hard physical activity
(sweating/out of breath) ...........

10.2 Describe exercise and physical exertion in your leisure time.
If your activity varies much e.g. between summer and winter, then give an average. The question refers only to the last year. (Tick the most appropriate box)

Reading, watching TV or other sedentary activity? ........................................ 1

Walking, cycling or other forms of exercise at least 4 hours a week? ......................................... 2

Participation in recreational sports, heavy gardening, etc.? .................................................. 3

Participation in hard training or sports competitions, regularly several times a week? ............................... 4

11. FAMILY AND FRIENDS

11.1 Do you live with:
Spouse/partner? ........................................ 1

11.2 How many good friends do you have? Number of friends

11.3 How much interest do people show for what you do? Great interest

11.4 How many associations, sport clubs, groups, religious communities or similar do you take part in? (Write 0 if none) Number

11.5 Do you feel that you can influence what happening in your local community where you live? (Tick only once)
Yes, a lot
Yes, some
Yes, a little
No
Never tried

12. ILLNESS IN THE FAMILY

12.1 Have one or more of your parents or siblings had a heart attack (heart wound) or angina pectoris (heart cramp)? .................................

12.2 Tick for the relatives who have or have had any of the illnesses: (Tick for each line)

12.3 If any relatives have diabetes, at what age did they get diabetes? (if for example many siblings, consider the one who got it earliest in life):

13. USE OF MEDICINES

With medicines, we mean drugs purchased at pharmacies. Supplements and vitamins are not considered here.

13.1 Do you use:

Blood pressure lowering drugs ........................

Cholesterol-lowering drugs ............................

13.2 How often have you during the last 4 weeks used the following medicines? (Tick once for each line)

13.3 For those medicines you have checked in points 13.1 and 13.2, and that you've used during the last 4 weeks:

State the name and the reason that you are taking/have taken these (disease or symptom):

(Tick for each duration you have used the medicine)

14. THE REST OF THE FORM IS TO BE ANSWERED BY WOMEN ONLY

14.1 How old were you when you started menstruating? Age in years

14.2 If you no longer menstruating, how old were you when you stopped menstruating? Age in years

14.3 Are you pregnant at the moment?
Yes
No
Uncertain

14.4 How many children have you given birth to?

14.5 Do you use, or have you ever used? (Tick once for each line)

14.6 If you use/write used prescription estrogen:

14.7 If you use contraceptive pills, mini pill, contraceptive injection, hormonal IUD or estrogen, what brand do you use?
Appendix 2-D:
First questionnaire for subjects aged >70 years
Tromsø V
Health survey

Personal invitation
### E1. YOUR OWN HEALTH

**What is your current state of health? (Tick only once)**

<table>
<thead>
<tr>
<th>Poor</th>
<th>Not so good</th>
<th>Good</th>
<th>Very good</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
</tbody>

<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### E6. BODY WEIGHT

Estimate your body weight when you were 25 years old:

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
</table>
E7. EDUCATION
How many years of education have you completed? Number of years
(include all the years you have attended school or studied)

E8. FOOD AND BEVERAGES
How often do you usually eat these foods? (Tick once for each line)
Rarely /never 1-3 times /month 1-3 times /week 4-6 times /week 1-2 times /day 3 times or more /day

Fruit, berries ...
Cheese (all types) ...
Potatoes ...
Boiled vegetables ...
Fat fish (e.g. salmon, trout, mackerel, herring)

Do you use dietary supplements:
Cod liver oil, fish oil capsules ...
Vitamins and/or mineral supplements ...

How much of the following do you usually drink? (Tick once for each line)

Full milk, full-fat curdled milk, yoghurt
Semi-skinned milk, semi-skinned curdled milk, low-fat yoghurt ...
Skimmed milk, skimmed curdled milk ...
Extra semi-skinned milk ...
Juice ...
Water ...
Soft drink, mineral water ...

How many cups of coffee and tea do you drink daily? (Put 0 for the types you do not drink daily) Number of cups

Filtered coffee ...
Boiled coffee/coarsely ground coffee for brewing ...
Other type of coffee ...
Tea ...

Approximately, how often have you during the last year consumed alcohol? (Do not count low-alcohol and alcohol-free beer)

Never consumed alcohol 1 2-3 times per month 2 3-4 times a week 3 4-7 times a week 4 1-2 times a month 5 About 1 time a week 6 About 1 time a year 7 1 time a year or less 8

To those who have consumed the last year:
When you drink alcohol, how many glasses or drinks do you normally drink? Number

E9. SMOKING
How many hours a day do you normally spend in smoke-filled rooms? Number of total hours

Did any of the adults smoke at home while you were growing up? Yes No

Do you currently, or did you previously live together with a daily smoker after your 20th birthday? Yes, now Yes, previously Never

If you have NEVER smoked daily; Go to question E11 (BODILY FUNCTIONS AND SAFETY)

If you smoke daily now, do you smoke:
Cigarettes ...
Cigars/cigarillos ...
A pipe ...

If you previously smoked daily, how long is it since you quit? Number of years

If you currently smoke, or have smoked previously:

How many cigarettes do you or did you normally smoke per day? Number of cigarettes

How old were you when you began daily smoking? Age in years

How many years in all have you smoked daily? Number of years

E10. BODILY FUNCTIONS AND SAFETY
Would you feel safe by walking alone in the evening in the area where you live? Yes A little unsafe Very unsafe

When it comes to mobility, sight and hearing, can you:
(Tick once for each line)

Take a 5 minute walk in fairly high pace? Without problems With some problems With great problems No

Read ordinary text in newspaper, if necessary with glasses? Without problems With some problems With great problems No

Hear what is said in a normal conversation? Without problems With some problems With great problems No

Do you because of chronic health problems have difficulties with: (Tick once for each line)

Move around in your home? No difficulties Some difficulties Great difficulties

Get out of your home by yourself? No difficulties Some difficulties Great difficulties

Participate in organization or other leisure time activities? No difficulties Some difficulties Great difficulties

Use public transport? No difficulties Some difficulties Great difficulties

Perform necessary daily shopping? No difficulties Some difficulties Great difficulties
E11. USE OF HEALTH SERVICES

How many times in the last 12 months have you been to/used:

(Tick once for each line)

<table>
<thead>
<tr>
<th>Medicine Type</th>
<th>None</th>
<th>1-3 times</th>
<th>4 or more</th>
</tr>
</thead>
<tbody>
<tr>
<td>A general practitioner (GP)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Specialist (private or out-patient clinic)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Emergency GP (private or public)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Hospital admission</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Home nursing care</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Physiotherapist</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Chiropractor</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Municipal home care</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Dentist</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Alternative practitioner</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Are you confident that you will receive health care and home assistance if you need it?

- Yes
- No
- Don't know

E12. FAMILY AND FRIENDS

Do you live:

- At home? [ ]
- In an institution/shared apartment? [ ]

Do you live with:

- Spouse/partner? [ ]
- Other people? [ ]

How many good friends do you have?

Count the ones you can talk confidentially with and who can give you help when you need it. Do not count people you live with, but do include your children and other relatives.

How much interest do people show for what you do?

(Tick only once)

- Great interest [ ]
- Some interest [ ]
- Little interest [ ]
- No interest [ ]
- Uncertain [ ]

How many associations, sport clubs, groups, religious communities, or similar do you take part in?

(Number 0 if none)

E13. CHILDHOOD/YOUTH AND AFFILIATION

How long altogether have you lived in the county? [ ] years

How long altogether have you lived in the municipality? [ ] years

Where did you live most of the time before the age of 16?

(Tick one option and specify)

- Same municipality [ ]
- Another municipality in the county [ ] Which one: __________
- Another county in Norway [ ] Which one: __________
- Outside Norway [ ] Country: __________

Have you moved during the last five years?

- No [ ]
- Yes, once [ ]
- Yes, more than once [ ]

E14. USE OF MEDICINES

With medicines, we mean drugs purchased at pharmacies. Supplements and vitamins are not considered here.

Do you use?

(Tick once for each line)

- Blood pressure lowering drugs [ ]
- Cholesterol-lowering drugs [ ]
- Drugs for osteoporosis [ ]
- Insulin [ ]
- Tablets for diabetes [ ]

How often have you during the last 4 weeks used the following medicines?

(Tick once for each line)

- Painkillers non-prescription [ ]
- Painkillers on prescription [ ]
- Sleeping pills [ ]
- Tranquillizers [ ]
- Antidepressants [ ]
- Other prescription medicines [ ]

State the name of the medicines you are using now and the reason you are taking the medicines (disease or symptom):

(Tick for each duration you have used the medicine)

- Never [ ]
- Previously, but not now [ ]
- Now [ ]

If there is not enough space here, you may continue on a separate sheet that you attach.

E15. THE REST OF THE FORM IS TO BE ANSWERED BY WOMEN ONLY

How old were you when you started menstruating?

Age in years [ ]

How old were you when you stopped menstruating?

Age in years [ ]

How many children have you given birth to?

Number of children [ ]

Do you use, or have you ever used estrogen?

- Never [ ]
- Previously [ ]
- Now [ ]

If you use estrogen, which brand you use now?

- Tablets or patches [ ]
- Cream or suppositories [ ]

If you use contraceptives, which brand you use now?

- Yes [ ]
- No [ ]

Have you ever used contraceptives pills? [ ]
Appendix 2-E:
Second questionnaire Tromsø V
Additional questions to the health survey in Troms and Finnmark 2001-2002

The main aim of the Tromsø Study is to improve our knowledge about cardiovascular diseases in order to aid prevention. The study is also intended to improve our knowledge of cancer and other general conditions, such as allergies, muscle pains and mental conditions. We would therefore like you to answer some questions about factors that may be relevant for your risk of getting these and other illnesses. This form is part of the Health Survey, which has been approved by the Norwegian Data Inspectorate and the Regional Board of Research Ethics. The answers will only be used for research purposes and will be treated strictly confidential.

T1. NEIGHBORHOOD AND HOME

1.1 In which municipality did you live at the age of 1 year? (If you have not lived in Norway, state country of residence instead of the municipality)

1.2 What type of house do you live in? (Tick only once)
- Detached house/villa..............................
- Farm ................................................................
- Flat/apartment ...........................................
- Terraced/semi-detached house ...................
- Institution/care home ................................
- Other .......................................................

1.3 How big is your house? $m^2$ (gross)

1.4 Are you bothered by: (Tick once for each line)
- Moisture, drought or coldness in your home
- Other forms of bad indoor climate
- Traffic noise (cars or aircraft)
- Other noise (industrial, construction, etc.)
- Neighbour noise
- Drinking water quality
- Air pollution from traffic
- Air pollution from wood/oil heating, factory etc.

1.5 What home language did your grandparents have? (Tick for one or more alternatives)
- Norwegian
- Sami
- Kven/Finnish
- Other

1.6 What do you consider yourself as? (Tick for one or more alternatives)
- Mostly sedentary work? (e.g. office work, mounting)
- Work that requires a lot of walking? (e.g. shop assistant, light industrial work, teaching)
- Work that requires a lot of walking and lifting? (e.g. Postman, nursing, construction)
- Heavy manual labour? (e.g. forestry, heavy farm-work, heavy construction)

1.7 Do you feel that you have enough good friends?

1.8 How often do you normally take part in organised gatherings, e.g. sewing circles, sports clubs, political meetings or other associations? (Tick only once)
- Never, or just a few times a year
- 1-3 times a month
- Approximately once a week
- More than once a week

T2. PAID AND UNPAID WORK

2.1 If you have paid or unpaid work, how would you describe your work? (Tick only once)
- Mostly sedentary work? (e.g. office work, mounting)
- Work that requires a lot of walking? (e.g. shop assistant, light industrial work, teaching)
- Work that requires a lot of walking and lifting? (e.g. Postman, nursing, construction)
- Heavy manual labour? (e.g. forestry, heavy farm-work, heavy construction)

2.2 Can you decide yourself how your work (paid or unpaid) should be organised? (Tick only once)
- No, not at all
- To a small extent
- Yes, to a large extent
- Yes, I decide myself

2.3 Are you on call, do you work shifts or nights?

The information you give us may later be linked with information from other public health registers in accordance with the rules laid down by the Data Inspectorate and the Regional Board of Research Ethics.

If you are unsure about what to answer, tick the box that you feel fits best.

The completed form should be sent to us in the enclosed prepaid envelope. Thank you in advance for helping us.

Yours sincerely

Department of Community Medicine
University of Tromsø

kg
T8. SYMPTOMS

8.1 Have you in the last two weeks felt: (Tick once for each question)

- Nervous or worried ........................................... 
- Bothered by anxiety......................................... 
- Confident and calm ......................................... 
- Irritable............................................................ 
- Happy and optimistic ........................................ 
- Down/depressed .............................................. 
- Lonely.............................................................

8.2 Do you cough about daily for periods of the year? Yes No

- If YES:
  - Is your cough productive? .............................. 
  - Have you had this kind of cough for as long as 3 months in each of the last two years?.....

8.3 Have you had episodes with wheezing in the chest? 

- If YES:
  - Has this occurred: (Tick once for each question)
    - At night ...................................................... 
    - In connection with respiratory infections .......... 
    - In connection with physical exertion ............... 
    - In connection with very cold weather ..............

8.4 Do you get pain in the calf while walking ....... Yes No

- If YES:
  - How long can you go before you notice the pain? meter

8.5 Do you get short-winded in the following situations? (Tick once for each question)

- While walking fast on level ground or slight up hills ......................................................
- While walking calmly on level ground ...........................................................
- While washing or dressing yourself ...........................................................
- While resting ....................................................

8.6 Do you have to stop because of short-windedness while walking in your own pace on level ground?...

8.7 Have you during the last year suffered from pain and/or stiffness in muscles and joints that have lasted continuously for at least 3 months?...

- If YES:
  - Has the complaint reduced your leisure time activity? ................................................

8.8 How often do you suffer from sleeplessness? (Tick only once)

- Never, or just a few times a year ......................
- 1-3 times a month ...........................................
- Approximately once a week ............................
- More than once a week ..................................

8.9 If you suffer from sleeplessness monthly or more frequently, what time of the year does it affect you most?

- No particular time of the year .........................
- Especially during the polar night .....................
- Especially during the midnight sun season .......
- Especially in spring and autumn .....................

8.10 Have you in the last year suffered from sleeplessness to the extent that it has affected your ability to work? Yes No

8.11 Do you usually sleep during the day?.............

8.12 How often do you suffer from urinary incontinence?

- Never ..........................................................
- Not more than once a month ..........................
- Two or more times a month ..........................
- Once a week or more ....................................

8.13 Are you able to walk down 10 steps without holding on to something (e.g. a handrail)?... Yes No

8.14 Do you use glasses?.................................

8.15 Do you use a hearing aid?.............................

8.16 How is your memory? (Tick once for each question)

- Do you forget what you just have heard or read?.................................................................
- Do you forget where you have placed things?.....
- Is it more difficult to remember now than earlier?..
- Do you more often write memos now than earlier?

If “YES” on one of these questions; Is this a problem in your daily life? Yes No

T9. MEDICINES

9.1 Do you use, or have you used any of the following medicines:

- Drugs for osteoporosis.................................
- Tablets for diabetes .................................
- Drugs for hypothyroidism (thyroxine) ..............

9.2 Do you use any medicines which you take as injections? (Tick only once)

If YES: Give the name of the medicines (for injection):

(one name per line)
### T10. ILLNESS IN THE FAMILY

10.1 Tick for the relatives who have or have ever had any of the diseases: *(Tick for each line)*

<table>
<thead>
<tr>
<th>Mother</th>
<th>Father</th>
<th>Brother</th>
<th>Sister</th>
<th>Child</th>
<th>None of these</th>
</tr>
</thead>
<tbody>
<tr>
<td>Heart attack (heart wound)</td>
<td></td>

</tbody>
</table>

10.2 How many siblings and children do you have?

<table>
<thead>
<tr>
<th>Number</th>
<th>Brothers</th>
<th>Sisters</th>
<th>Children</th>
</tr>
</thead>
</table>

10.3 Do you usually do extra caring work because of illness etc. in your close family?

<table>
<thead>
<tr>
<th>Yes, daily/almost daily</th>
<th>Yes, sometimes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
</tbody>
</table>

10.4 Do you or your family receive home aid or home nursing care?

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
</table>

10.5 Is your mother alive? ......

<table>
<thead>
<tr>
<th>Age at death</th>
</tr>
</thead>
<tbody>
<tr>
<td>years</td>
</tr>
</tbody>
</table>

10.6 Is your father alive? ......

<table>
<thead>
<tr>
<th>Age at death</th>
</tr>
</thead>
<tbody>
<tr>
<td>years</td>
</tr>
</tbody>
</table>

### T11. MOBILE TELEPHONE

11.1 Do you have (own, rent, etc.) a mobile telephone?

<table>
<thead>
<tr>
<th>Yes, always</th>
<th>Yes, sometimes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
</tr>
</tbody>
</table>

If Yes:

What do you use your mobile telephone for, and how often do you use it? *(Tick once for each line)*

<table>
<thead>
<tr>
<th>Number of times per day</th>
<th>30 or more</th>
<th>10-29</th>
<th>2-9</th>
<th>1 or less</th>
<th>Never</th>
</tr>
</thead>
<tbody>
<tr>
<td>Conversations..</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Text messaging</td>
<td>12345</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### T12. THE REST IS TO BE ANSWERED BY WOMEN ONLY

12.1 If you have given birth, fill in each child’s birth year and how many months you breastfed after delivery.

*(If you did not breastfeed, write 0)*

<table>
<thead>
<tr>
<th>Child</th>
<th>Birth year</th>
<th>Number of months breastfed</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st</td>
<td></td>
<td>T</td>
</tr>
<tr>
<td>2nd</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3rd</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4th</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5th</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6th</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(If more children, use additional sheet)

12.2 If you still have menstruate or are pregnant: What date did your last menstruation start?

<table>
<thead>
<tr>
<th>Day</th>
<th>Month</th>
<th>Year</th>
</tr>
</thead>
</table>

12.3 If you no longer menstruate; why did your periods stop? *(Tick once)*

- It stopped by itself ........................................
- Uterus surgery ............................................
- Surgically removed both ovaries ..........................
- Other reason (e.g. radiation, chemotherapy) .......

12.4 Do you use or have you used prescribed estrogen (tablets or patches)?

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
</table>

If YES:

How old were you when you started taking estrogen? ........

If you stopped using estrogen, How old were you when you stopped taking estrogen? ........

12.5 Do you use or have you used oral contraceptive pills?

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
</table>

If YES:

How old were you when you started taking the pill? ........

If you stopped taking the pill, How old were you when you stopped? ......

12.6 Apart from pregnancy and after giving birth, have you ever stopped having menstruation for 6 months or more?

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
</table>

If YES:

How many years in total have you taken the pills? .... Number of years

If you have given birth:

How many years did you take the pill before your first delivery? .... Number of years

If you stopped taking the pill:

How old were you when you stopped? ......

12.7 How is your current menstruation status?

- I have not had menstruation in the last year ........................
- I have regular menstruation ............................
- I have irregular menstruation ..........................

12.8 When you were 25-29 years old, how many days usually passed between the start of two periods?

<table>
<thead>
<tr>
<th>Minimum</th>
<th>Maximum</th>
<th>Do not know</th>
</tr>
</thead>
<tbody>
<tr>
<td>days</td>
<td>days</td>
<td></td>
</tr>
</tbody>
</table>

The periods were of approximately equal length every time? ..... Yes No

How many days did a typical menstrual bleeding period last? ...

Thank you for the help!

Remember to mail the form today!
Appendix 3:

The Sixth Tromsø Study (T6)
Appendix 3-A:
Information to participants in Tromsø VI
Den 6. Tromsøundersøkelsen er i gang!

Hvor og når
Undersøkelsen vil foregå ved den gamle husmorskolen, Gamle Breivang.

Åpningstidene for Tromsøundersøkelsen er:
Mandag og torsdag: 10.30-13.30 og 14.30-18.00
Tirsdag og onsdag: 08.30-11.30 og 12.30-16.00
Fredag: 08.30-11.30 og 12.30-14.00

Du har fått tildelt fremmøtetid:

Adressen er: Breivangveien 23, 9010 Tromsø

Kan du ikke komme på dette tidspunktet er du velkommen når som helst i åpningstiden vår. Du behøver ikke gi beskjed om du skulle komme til en annen tid.

Buss
Følgende buss kan brukes:
Fra Sentrum (Wi-To) og Gjæverbukta: Rute 24. Stoppped: Dramsveien
Fra Sentrum (Wi-To): Rute 20 og 24. Stoppeed: Dramsveien
Rute 27,32 og 42. Stoppeed: Stakkevollveien.

Kart
Kart som viser hvor Tromsøundersøkelsen foregår, finnes på baksida av dette arket.
Forberedelser til undersøkelsen
Av hensyn til måling av blodtrykk bør du ha på klær som ikke strammer på armer og bein. Ha gjerne et korset plagg innerst.

Du vil bli spurrt om hva du har brukt av smertestillende midler det siste døgnet. Et utvalg vil bli spurrt om bruk av antibiotika (penicillin og lignende legemidler) det siste døgnet. Det vil bli spurrt om navnet på legemiddelet og hvor mye du har brukt.

Kvinnene vil få spørsmål om menstruasjon og eventuell bruk av hormoner som påvirker menstruasjonen.

Ta gjerne med deg legemidlene du bruker ved frammøte til undersøkelsen.

Du finner mer informasjon om undersøkelsen i vedlagte brosjyre.

Med vennlig hilsen

Tromsøundersøkelsen
Appendix 3-B:
Information leaflet Tromsø VI
Vil du være med i den 6. Tromsøundersøkelsen?

» viktig forskning
» undersøkelse av egen helse
» forebygging av helseproblemer
Hva er Tromsøundersøkelsen?

Tromsøundersøkelsen er et stort forskningsprosjekt. Opplysninger som samles inn skal brukes til å gi oss kunnskap som kan bedre menneskers helse.

Den første Tromsøundersøkelsen ble gjennomført allerede i 1974, og dette er den sjette i rekken. Et viktig mål med undersøkelsen er å få kunnskap om hvorfor noen blir syke mens andre beholder god helse gjennom livet.

Visste du at ..?

Den som deltar på Tromsøundersøkelsen får også en enkel undersøkelse av sin egen helse.

Hva forskes det på i Tromsøundersøkelsen?

Tromsøundersøkelsen gjennomføres først og fremst for å kunne øke kunnskapen om de store folkehelseproblemene og forhold som påvirker disse, blant annet:

» Hjerte- og karsykdommer
» Lungesykdommer (f.eks. KOLS)
» Diabetes
» Stoffskiftesykdommer
» Kreftsykdommer
» Psykiske plager
» Demens
» Muskel- og skjelettplager

Undersøkelsen vil også bli benyttet til forskning om bruk og effekter av legemidler, trivsel, livskvalitet, livsstil, døgnrhythme, smerters, sosial ulikhet, fysisk aktivitet, kosthold, bruk av helsetjenester og alternativ behandling. Det vil også bli undersøkt om miljøgifter kan påvises i blodet og om disse innvirker på helse.

Videre vil det bli gjort forskning på kvinnesykdommer, sykdommer i fordøyelsesorganer, allergier, nyrer og urinveier, nervesystemet, sanseorganer og hud. Det vil også bli forsket på arbeidsuførhet som følge av disse sykdommene eller tilstandene. En del av prosjektene vil spesielt undersøke samspillet mellom arv, miljø, sykdom og helse. Til slike prosjekter vil det bli hentet ut DNA (arvestoff) fra blodprøvene.

Det er allerede planlagt mange forskningsprosjekter som skal benytte data fra Tromsøundersøkelsen. Du vil finne en liste over disse på vår internetside:

http://www.tromso6.no

Vil du delta?

Ved å delta på Tromsøundersøkelsen er du med på å bidra til forskning om hvordan sykdom kan forebygges og behandles, hva som fremmer god helse, og hva som er årsak til helseproblemer.

Hvorfor spør vi deg?

Alle som møtte til spesialundersøkelsene i Tromsøundersøkelsen i 1994 og 2001, og et tilfeldig uttrukket utvalg av personer som er over 30 år og som er innbyggere i Tromsø kommune, blir spurt om å delta.

Alle er viktige!

Hver deltaker er like viktig, enten du er ung eller gammel, frisk eller syk. Det har vært stort frammeete til de tidligere Tromsøundersøkelserne. Godt oppmøte er viktig for gode forskningsresultater.

Det er en styrke for forskningen at de som har vært med i tidligere Tromsøundersøkelser møter fram på nytt.

Frivillig

**Visste du at ..?**
Du kan delta på Tromsøundersøkelsen selv om det er deler av undersøkelsen du ikke ønsker å være med på.

**Din helse**
Cirka fire uker etter undersøkelsen vil du få et brev med resultatene fra målinger av kolesterol og blodtrykk. Dersom det er nødvendig, vil du bli anbefalt å ta kontakt med din fastlege. Det blir ikke gitt rutinemessig tilbakemelding om resultater av andre blodprøver eller målinger.

Dersom resultatet av prøvene viser at det er nødvendig med oppfølging av lege eller henvisning til spesialist, vil du bli orientert om det. Ved behov for henvisning til spesialist, vil du sørge for at slik henvisning blir sendt.

Du kan reservere deg mot å få vite resultatene av prøvene dine. Men hvis et prøveresultat er slik at det er nødvendig med rask legebehandling, vil du uansett bli kontaktet.

Tromsøundersøkelsen er gratis. Trenger du videre undersøkelse / oppfølging av fastlegen eller i spesialisthelsetjenesten, betaler du vanlige egenandel.

**Slik foregår undersøkelsen**

**Unngå før undersøkelsen**
For at resultatene skal bli mest mulig korrekt, er det en fordel om du avstår fra alkohol og smertestillende medisiner 12 timer før undersøkelsen.

**Påkledning**
Vekt og høyde, liv- og hoftevidde måles med lett påkledning, men uten sko. For at det skal gå raskt å måle blodtrykk, er det en fordel om du har plagg som ikke strammer over armen og benet. Ha gjerne et kortermet plagg innerst.

**Spørreskjema**

Utfylte svar i spørreskjema er like viktig for forskningen som resultater fra blodprøver og undersøkelser.
Regelmessig bruk av legemidler

Undersøkelser

De måler høyde, vekt, hoftevidde og livvidde, de måler blodtrykket og tar blodprøve av deg. I tillegg vil følgende undersøkelser bli gjort:
» Beintetthetsmåling (måling av beinmasse) i den ene armen med svake røntgenstråler. Målingene bruker til å undersøke risiko for beinskjørhet og brudd.
» Bakterieprøve fra nese og hals fra om lag halvparten av deltagerne, for å se etter gule stafylokokker, en bakterie som normalt finnes på hud og slimhinner hos mennesker, men som i enkelte tilfeller kan forårsake alvorlige infeksjoner. Prøven gjøres med fuktet vattpensel.
» Hårprøve. Vi vil be om å få noen hårstrå for å undersøke forekomsten av spormetaller som kvikksølv.
» Fysisk aktivitet og kosthold. Vi planlegger at utvalgte deltakere vil bli bedt om å registrere fysisk aktivitet (aktivitetsmålere som skritttellere og lignende) og kosthold i en periode.

Blodprøver
Blodet fordeles på fem glass, men til sammen utgjør det ikke mer enn 45 milliliter, som er mindre enn en tidel av det en blodgiver gir. For de aller fleste vil det være tilstrekkelig med ett stikk. Disse analyserne blir gjort:
» Måling av kolesterol og andre fettstoffer, blodssukker, blodlegemer, stoffskifteprøver, hormoner, markører for betennelsesreaksjoner, allergi, mage- og tarmfunksjon, lever- og nyrerefunksjon samt muskel- og beinmarkører.
» DNA (arvestoff) vil bli lagret til bruk i forskningsprosjekter som er omtalt i denne brosjyren og som kartlegger sammenhengen mellom arv og miljø, sykdom og helse. DNA vil ikke bli brukt til andre formål enn forskning.
» Miljøgifter, blant annet sporstoffer, spormetaller og organiske stoffer. Forekomsten i blodet skal sammenlignes med tilsvarende målinger i andre befolkninger. Forskere vil studere om miljøgifter kan påvirke helsa vår.

Spesialundersøkelsen
Når første del av Tromsøundersøkelsen er gjennomført, kan du bli forespurt om å delta i en eller flere deler av Spesialundersøkelsen noen uker senere. Over halvparten vil bli spurt om dette. Hele Spesialundersøkelsen vil vare cirka en time, og
varigheten vil være avhengig av hvor mange deler du blir spurt om å være med på. Ved oppmøte til Spesialundersøkelsen vil det bli tatt ny blodprøve som skal brukes til samme formål som beskrevet for første del av undersøkelsen. Deler av blodprøven blir frosset ned for senere bruk i forskning som er beskrevet i denne brosjyren.

**Hvilke undersøkelser gjøres i Spesialundersøkelsen?**

» Ultralyd av blodårene (arteriene) på halsen. Undersøkelsen gjøres for å se etter forkalkninger og innsnevringer av årene. Undersøkelsen kartlegger også blodforsyningen til hjernen.

» Ultralyd av hjertet gjøres for å undersøke hjertets form og funksjon.

» Måling av beintetthet i rygg/hofte og kroppens fettmengde. Målingene brukes til å undersøke risiko for beinskjørhet og brudd, og for studier om sammenhengen mellom kroppsfeett, beinmasse og brudd.

» Taster av hukommelse gjøres ved hjelp av enkle spørsmål og omfatter også evne til gjennmmening av ord og grad av fingerbevegelse.

» Ny bakterieprøve fra nese og hals. Prøven utføres på samme måte som i første del av undersøkelsen.

For å sikre høy kvalitet på forskningsdata ønsker vi å undersøke et lite utvalg som møter til undersøkelsen to ganger med circa en ukkes mellomrom. De som er aktuelle vil bli forespurt om dette ved frammøte.

**Nye prosjekter**

Noen deltakere vil i ettermidt bli spurt om å delta i videre undersøkelser. Hvis dette gjelder deg, vil du få en forespørsel i posten. Du er ikke forpliktet til å delta selv om du har deltatt i andre deler av Tromsøundersøkelsen. Omtale av alle delprosjektene finner du på nettsiden vår:

http://www.tromso6.no

**Forsikring og finansiering**

Deltakere i Tromsøundersøkelsen er forsikret gjennom Norsk Pasientskadeerstatning.

Tromsøundersøkelsen er finansiert av Universitetet i Tromsø, Helse Nord HF samt ulike forskningsfond.
Etikk, personvern og sikkerhet

Du kan være trygg på at informasjon som gis til Tromsøundersøkelsen vil bli behandlet med respekt for personvern og privatliv, og i samsvar med lover og forskrifter. Alle medarbeidere som jobber med undersøkelsen har taushetsplikt. Opplysninger som samles inn vil bare bli brukt til godkjennte forskningsformål.

Den enkelte forsker får ikke tilgang til opplysninger som gjør det mulig å identifisere enkeltpersoner. Hver enkelt deltaker har en rett til å vite hvilke opplysninger som er lagret om en selv.

For alle prosjekter kreves det at prosjektlederen tilhører en kompetent forskningsinstitusjon.

Tromsøundersøkelsen har konsesjon fra Dataforskningsbyrået og er godkjent av Regional komité for medisinsk forskningsetikk, Nord-Norge.

Sammenstilling med andre registre

Opplysninger om deg fra den sjette Tromsøundersøkelsen kan bli knyttet sammen med opplysninger fra tidligere Tromsøundersøkelser. For enkelte prosjekter kan det være aktuelt å sammenstille opplysninger om deg med opplysninger fra barn, søsken, foreldre og besteavenger når disse har deltatt i Tromsøundersøkelsen.

For spesielle forskningsprosjekter kan det være aktuelt å sammenstille informasjon fra Tromsøundersøkelsen med nasjonale helseregistre som Reseptregisteret, Medisinsk fodselsregister, Kreftregisteret, Norsk pasientregister og Dødsårsaksregisteret, og andre nasjonale registre over sykdommer som det foreskes på i Tromsøundersøkelsen.

I tillegg kan det være aktuelt å innhente helseopplysninger fra primær- og spesialisthelsetjenesten til bruk i forskning på sykdommer og helseproblemer som er nevnt i denne brosjyren, for eksempel hjerte-karsykdom, diabetes og beinbrudd. I slike tilfeller innhentes nytt samtykke, eller annen type godkjenning (dispensasjon fra taushetsplikten).

Informasjon fra Tromsøundersøkelsen kan også bli sammenstilt med registre ved Statistisk sentralbyrå, for eksempel om miljø, befolkning, utdanning, inntekt, offentlige ytelser, yrkesdeltakelse og andre forhold som kan ha betydning for helsa.

Slike sammenstillingser krever noen ganger forhåndsgodkjening av offentlige instanser, for eksempel Regional komité for medisinsk forskningsetikk, Datatilsynet eller NAV.

Bruk av innsamlede data i framtiden

Data fra Tromsøundersøkelsen vil kun bli brukt til forskning og vil ikke kunne brukes til andre formål.

Opplysninger og prøver som du gir, blir oppbevart på ubestemt tid til bruk i forskning til formål som nevnt i denne brosjyren. I noen tilfeller kan det bli aktuelt å gjøre analyser av blodprøver ved forskningsinstitusjoner i utlandet. Hvis dette gjøres, vil det skje i en slik form at våre utenlandske samarbeidspartnere ikke kan knytte prøvene opp mot deg som person.

Hva som er aktuelle problemstillinger i medisinsk forskning forandrer seg hele tiden. I framtiden kan data bli brukt i forskningsprosjekter som i dag ikke er planlagt, forutsatt at det er i samsvar med gjeldende lover og forskrifter. For alle slike nye prosjekter kreves det at prosjektet er godkjent av Regional komité for medisinsk forskningsetikk og Datatilsynet.

Tromsøundersøkelsen informerer om nye forskningsprosjekter på: http://www.tromso6.no

Her kan du også lese om forskningsresultatene fra Tromsøundersøkelsen. Forskningsresultater vil ellers bli publisert i internasjonale og nasjonale tidsskrifter, på faglige konferanser og møter. Det vil ikke være mulig å identifisere enkeltpersoner når forskningsresultatene offentliggjøres.
Samtykke
Hvis du vil delta i den sjette Tromsøundersøkelsen, må du gi skriftlig samtykke til dette. Personalet på Tromsøundersøkelsen vil kunne gi mer informasjon om undersøkelsen, og kan svare deg dersom du har spørsmål i forbindelse med samtykket.

Hvis du vil trekke tilbake ditt samtykke, henvend deg til:
Tromsøundersøkelsen, Inst. for samfunnsmedisin
Universitetet i Tromsø
9037 Tromsø
telefon: 77 64 48 16
telefaks: 77 64 48 31
e-post: tromsous@ism.uit.no
internett: www.tromso6.no

Hvis vi i framtiden ønsker å forske på nye spørsmål som ikke er beskrevet i denne brosjyren, kan det bli nødvendig å be deg om et nytt samtykke.

Vil du delta?
Følgende tekst er en kopi av dokumentet du blir bedt om å signere når du møter fram til undersøkelsen:
Samtykke til bruk av helseopplysninger i forskning - den 6. Tromsøundersøkelsen

I brosjyren jeg har fått tilsendt, har jeg lest om undersøkelsens innhold og formål, og jeg har hatt mulighet til å stille spørsmål. Jeg samtykker herved i å delta i undersøkelsen [dato/signatur].

Declaration of consent Tromsø VI
Samtykke til bruk av helseopplysninger i forskning, den 6. Tromsøundersøkelsen

I Brosjyren jeg har fått tilsendt, har jeg lest om undersøkelsens innhold og formål, og jeg har hatt mulighet til å stille spørsmål. Jeg samtykker herved i å delta i undersøkelsen.

Dato:_________Signatur:________________________________________
Appendix 3-D:
First questionnaire Tromsø VI
### HEALTH AND DISEASES

1. **How do you in general consider your own health to be?**
   - [ ] Very good
   - [ ] Good
   - [ ] Neither good nor bad
   - [ ] Bad
   - [ ] Very bad

2. **How is your health compared to others in your age?**
   - [ ] Much better
   - [ ] A little better
   - [ ] About the same
   - [ ] A little worse
   - [ ] Much worse

3. **Do you have, or have you had?**
   - A heart attack
   - Angina pectoris (heart cramp)
   - Cerebral stroke/brain hemorrhage
   - Atrial fibrillation
   - High blood pressure
   - Osteoporosis
   - Asthma
   - Chronic bronchitis/Emphysema/COPD
   - Diabetes
   - Psychological problems (for which you have sought help)
   - Hypothyroidism
   - Kidney disease, not including urinary tract infection (UTI)
   - Migraine

4. **Do you have persistent or constantly recurring pain that has lasted for 3 months or more?**
   - [ ] Yes
   - [ ] No

5. **How often have you suffered from sleeplessness during the last 12 months?**
   - [ ] Never, or just a few times
   - [ ] 1-3 times a month
   - [ ] Approximately once a week
   - [ ] More than once a week

6. **Below you find a list of various problems. Have you experienced any of this during the last week (including today)?**
   - [ ] No complaint
   - [ ] Little complaint
   - [ ] Pretty much complaint
   - [ ] Very much complaint
   
   - Sudden fear without reason
   - Felt afraid or anxious
   - Faintness or dizziness
   - Felt tense or upset
   - Tend to blame yourself
   - Sleeping problems
   - Depressed, sad
   - Feeling of being useless, worthless
   - Feeling that everything is a struggle
   - Feeling of hopelessness with regard to the future

### USE OF HEALTH SERVICES

7. **Have you during the last 12 months visited:**
   - If YES; how many times?
   - **General practitioner (GP)**
   - **Psychiatrist/psychologist**
   - **Medical specialist outside hospital** (other than general practitioner/psychiatrist)
   - **Physiotherapist**
   - **Chiropractor**
   - **Alternative practitioner** (homeopath, acupuncturist, foot zone therapist, herbal medicine practitioner, laying on hands practitioner, healer, clairvoyant, etc.)
   - **Dentist/dental service**

8. **Have you during the last 12 months been to a hospital?**
   - Admitted to a hospital
   - Had consultation in a hospital without admission:
     - At psychiatric out-patient clinic
     - At another out-patient clinic

9. **Have you undergone any surgery during the last 3 years?**
   - [ ] Yes
   - [ ] No
**USE OF MEDICINES**

10 Do you currently use, or have you used some of the following medicines? (Tick once for each line)

- Blood pressure lowering drugs
- Cholesterol lowering drugs
- Drugs for heart disease
- Diuretics
- Drugs for osteoporosis
- Insulin
- Tablets for diabetes
- The drugs for hypothyroidism
- Thyroxine/levalin

11 How often have you during the last 4 weeks used the following medicines? (Tick once for each line)

- Painkillers on prescription
- Painkillers non-prescription
- Sleeping pills
- Tranquilizers
- Antidepressants

12 State the name of all medicines - both those on prescription and non-prescription drugs - you have used regularly during the last 4 weeks. Do not include vitamins, minerals, herbs, natural remedies, other nutritional supplements, etc.

13 FAMILY AND FRIENDS

13 Who do you live with? (Tick for each question and give the number)

- Spouse/partner
- Other people older than 18 years
- People younger than 18 years

14 Tick for the relatives who have or have had

- Parents
- Children
- Siblings
- A heart attack
- A heart attack before age of 60
- Angina pectoris (heart cramp)
- Cerebral stroke/brain haemorrhage
- Osteoporosis
- Gastric/duodenal ulcers
- Asthma
- Diabetes
- Dementia
- Psychological problems
- Substance abuse

15 Do you have enough friends who can give you help when you need it?
- Yes
- No

16 Do you have enough friends whom you can talk confidentially with?
- Yes
- No

17 How often do you normally take part in organised gatherings, e.g. sport clubs, political meetings, religious or other associations?
- Never, or just a few times a year
- 1-2 times a month
- Approximately once a week
- More than once a week

**WORK, SOCIAL SECURITY AND INCOME**

18 What is the highest level of education you have completed? (Tick once)
- Primary/secondary school, modern secondary school
- Technical school, vocational school, 1-2 years senior high school
- High school diploma
- College/university less than 4 years
- College/university 4 years or more

19 What is your main activity? (Tick once)
- Full time work
- Part time work
- Unemployed
- Housekeeping
- Retired/benefit recipient
- Student/military service
Do you receive any of the following benefits?
- Old-age, early retirement or survivor pension
- Sickness benefit (on sick leave)
- Rehabilitation benefit
- Full disability pension
- Partial disability pension
- Unemployment benefits
- Transition benefit for single parents
- Social welfare benefits

What was the household’s total taxable income last year? Include income from work, pensions, benefits and similar
- Less than 125 000 NOK
- 125 000-200 000 NOK
- 201 000-300 000 NOK
- 301 000-400 000 NOK
- More than 400 000 NOK

Do you work outdoor at least 25% of the time, or in cold buildings (e.g. storehouse/industry buildings)?
- Yes
- No

**PHYSICAL ACTIVITY**

If you have paid or unpaid work, which statement describes your work best?
- Mostly sedentary work
  (e.g. office work, mounting)
- Work that requires a lot of walking
  (e.g. shop assistant, light industrial work, teaching)
- Work that requires a lot of walking and lifting
  (e.g. postman, nursing, construction)
- Heavy manual labour

Describe your exercise and physical exertion in leisure time. If your activity varies much, e.g. between summer and winter, then give an average. The question refers only to the last year. (Tick the most appropriate box)
- Reading, watching TV, or other sedentary activity.
- Walking, cycling, or other forms of exercise at least 4 hours a week (include walking or cycling to work, Sunday-walk/stroll, etc.)
- Participation in recreational sports, heavy gardening, etc. (note: duration of activity at least 4 hours a week)
- Participation in hard training or sports competitions, regularly several times a week.

How often do you exercise?
- Never
- Less than once a week
- Once a week
- 2-3 times a week
- Approximately every day

How hard do you exercise on average?
- Easy- do not become short-winded or sweaty
- You become short-winded and sweaty
- Hard- you become exhausted

For how long time do you exercise every time on average?
- Less than 15 minutes
- 15-29 minutes
- 30-60 minutes
- More than 1 hour

**ALCOHOL AND TOBACCO**

How often do you drink alcohol?
- Never
- Monthly or less frequently
- 2-4 times a month
- 2-3 times a week
- 4 or more times a week

How many units of alcohol (a beer, a glass of wine or a drink) do you usually drink when you drink alcohol?
- 1-2
- 3-4
- 5-6
- 7-9
- 10 or more

How often do you drink 6 units of alcohol or more in one occasion?
- Never
- Less frequently than monthly
- Monthly
- Weekly
- Daily or almost daily

Do you smoke sometimes, but not daily?
- Yes
- No

Do you/did you smoke daily?
- Yes, now
- Yes, previously
- Never

If you previously smoked daily, how long is it since you quit?
- Number of years

If you currently smoke, or have smoked previously:
- How many cigarettes do you or did you usually smoke per day?
- Number of cigarettes

How old were you when you began daily smoking?
- Age in years

How many years in all have you smoked daily?
- Number of years

Do you use or have you used snuff or chewing tobacco?
- No, never
- Yes, previously
- Yes, daily
**Diet**

38. Do you usually eat breakfast every day?
   - Yes
   - No

39. How many units of fruit or vegetables do you eat on average per day? (units means for example a fruit, a cup of juice, potatoes, vegetables)
   - Number of units

40. How many times a week do you eat warm dinner?
   - Number

41. How often do you usually eat these foods? (Tick once for each line)
   - Potatoes: 0-1 times/mth, 2-3 times/mth, 1-3 times/week, 4-6 times/week, 1-2 times/day
   - Pasta/rice: 0-1 times/mth, 2-3 times/mth, 1-3 times/week, 4-6 times/week, 1-2 times/day
   - Meat (not processed): 0-1 times/mth, 2-3 times/mth, 1-3 times/week, 4-6 times/week, 1-2 times/day
   - Processed meat (sausage, hamburger, etc.): 0-1 times/mth, 2-3 times/mth, 1-3 times/week, 4-6 times/week, 1-2 times/day
   - Fruits, vegetables, berries: 0-1 times/mth, 2-3 times/mth, 1-3 times/week, 4-6 times/week, 1-2 times/day
   - Lean fish: 0-1 times/mth, 2-3 times/mth, 1-3 times/week, 4-6 times/week, 1-2 times/day
   - Fatty fish (e.g. salmon, trout, mackerel, herring, halibut, redfish): 0-1 times/mth, 2-3 times/mth, 1-3 times/week, 4-6 times/week, 1-2 times/day

42. How much do you usually drink the following? (Tick once for each line)
   - Milk, curdled milk, yoghurt: Rarely/never, 1-6 glasses/week, 1 glass/day, 2-3 glasses/day, 4 or more glasses/day
   - Juice: Rarely/never, 1-6 glasses/week, 1 glass/day, 2-3 glasses/day, 4 or more glasses/day
   - Soft drinks: Rarely/never, 1-6 glasses/week, 1 glass/day, 2-3 glasses/day, 4 or more glasses/day
   - Tea: Rarely/never, 1-6 glasses/week, 1 glass/day, 2-3 glasses/day, 4 or more glasses/day

43. How many cups of coffee and tea do you drink daily? (Put 0 for the types you do not drink daily)
   - Number of cups

44. How often do you usually eat cod liver and roe? (i.e. "målje")
   - Rarely/never
   - 1-3 times/year
   - 4-6 times/year
   - 7-12 times/year
   - More than 12 times/year

45. Do you use the following nutritional supplements? (Daily / Sometimes / No)
   - Cod liver oil or fish oil capsules
   - Omega 3 capsules (fish oil, seal oil)
   - Calcium tablets

**Questions for Women**

46. Are you pregnant at the moment?
   - Yes
   - No
   - Uncertain

47. How many children have you given birth to?
   - Number

48. If you have given birth, fill in for each child: birth year, birth weight and months of breastfeeding (Fill in the best you can)
   - Child: Birth year, Birth weight in grams, Months of breastfeeding

49. Have you during pregnancy had high blood pressure?
   - Yes
   - No

50. If yes, during which pregnancy?
   - The first
   - Second or later

51. Have you during pregnancy had proteinuria?
   - Yes
   - No

52. If yes, during which pregnancy?
   - The first
   - Second or later

53. Were any of your children delivered prematurely (a month or more before the due date) because of preeclampsia?
   - Yes
   - No

54. If yes, which child?
   - 1st child, 2nd child, 3rd child, 4th child, 5th child, 6th child

55. How old were you when you started menstruating?
   - Age

56. Do you currently use any prescribed drug influencing the menstruation?
   - Oral contraceptives, hormonal intrauterine or similar
   - Yes
   - No
   - Hormone treatment for menopausal problems
     - Yes
     - No

---

When attending you will get supplementary questions about menstruation and any use of hormones. Write down on a sheet of paper the names of all the hormones you have used and bring it with you. You will also be asked whether your menstruation have ceased and possibly when and why.
Appendix 3-E:
Second questionnaire Tromsø VI
FILL OUT THE FORM IN THIS WAY:

The form would be read by machine, it is therefore important that you tick appropriately:

- ✕ Correct
- ✔ Wrong
- ✗ Wrong

If you tick the wrong box, correct by filling the box like this

Write the numbers clearly 1 2 3 4 5 6 7 8 9 0

7 4 Correct
7 4 Wrong

Use only black or blue pen, do not use pencil or felt tip pen
1. DESCRIPTION OF YOUR HEALTH STATUS

By placing a tick in one box in each group below, please indicate which statements best describe your own health state today:

1.6 To allow you to show us how good or bad your state of health is we have made a scale (almost like a thermometer) where the best state of health you can imagine is marked 100 and the worst 0. We ask you to show your state of health by drawing a line from the box below to the point on the scale that best fits your state of health.

1.01 Mobility
- [ ] I have no problems in walking about
- [ ] I have some problems in walking about
- [ ] I am confined to bed

1.02 Self-care
- [ ] I have no problems with self-care
- [ ] I have some problems washing or dressing myself
- [ ] I am unable to wash or dress myself

1.03 Usual activities (e.g. work, study, housework, family or leisure activities)
- [ ] I have no problems with performing my usual activities
- [ ] I have some problems with performing my usual activities
- [ ] I am unable to perform my usual activities

1.04 Pain and discomfort
- [ ] I have no pain or discomfort
- [ ] I have moderate pain or discomfort
- [ ] I have extreme pain or discomfort

1.05 Anxiety and depression
- [ ] I am not anxious or depressed
- [ ] I am moderately anxious or depressed
- [ ] I am extremely anxious or depressed

Best imaginable health state

Worst imaginable health state
2. CHILDHOOD/YOUTH AND AFFILIATION

2.01 Where did you live at the age of 1 year?
- [ ] In Tromsø (with present municipal borders)
- [ ] In Trome, but not Tromsø
- [ ] In Finnmark
- [ ] In Nordland
- [ ] Another place in Norway
- [ ] Abroad

2.02 How was your family's financial situation during your childhood?
- [ ] Very good
- [ ] Good
- [ ] Difficult
- [ ] Very difficult

2.03 What is the importance of religion in your life?
- [ ] Very important
- [ ] Somewhat important
- [ ] Not important

2.04 What do you consider yourself as? (Tick for one or more alternatives)
- [ ] Norwegian
- [ ] Sami
- [ ] Kven/Finnish
- [ ] Another

2.05 How many siblings and children do you have/have you had?
Number of siblings: ___________
Number of children: ___________

2.06 Is your mother alive?
- [ ] Yes
- [ ] No
If NO: her age when she died: ___________

2.07 Is your father alive?
- [ ] Yes
- [ ] No
If NO: his age when he died: ___________

2.07 What was/is the highest completed education for your parents and your spouse/partner?
(Tick once for each column)

<table>
<thead>
<tr>
<th>Education Level</th>
<th>Mother</th>
<th>Father</th>
<th>Spouse/Partner</th>
</tr>
</thead>
<tbody>
<tr>
<td>7-10 years primary/secondary school</td>
<td>☐</td>

<tr>
<td>I am being bullied or harassed at work</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>I am being treated fairly at work</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

3.03 I consider my occupation to have the following social status in the society 
(if you are not currently employed, think about your latest occupation) 

- [ ] Very high status
- [ ] Fairly high status
- [ ] Medium status
- [ ] Fairly low status
- [ ] Very low status

3.04 Have you over a long period experienced any of the following? (Tick one or more for each line) 

<table>
<thead>
<tr>
<th>No</th>
<th>Yes, as a child</th>
<th>Yes, as adult</th>
<th>Yes, last year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Been tormented, or threatened with violence</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>Been beaten, kicked at or victim of other types of violence</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
<tr>
<td>Someone in your close family have used alcohol or drugs in such a way that it has caused you worry</td>
<td>☐</td>
<td>☐</td>
<td>☐</td>
</tr>
</tbody>
</table>

If you have experienced anything of the above, how much are you affected by that now? 

- [ ] Not affected
- [ ] Affected to some extent
- [ ] Affected to a large extent
4. ILLNESS AND WORRIES

4.01 Have you during the last month experienced any illness or injury?  
☐ Yes  ☐ No

If YES: have you during the same period?  
(Tick once for each line)  
Yes  No

Been to a general practitioner .......... ☐ ☐
Been to a medical specialist .......... ☐ ☐
Been to emergency department .......... ☐ ☐
Been admitted to a hospital .......... ☐ ☐
Been to an alternative practitioner  (chiropractor, homeopath or similar) .......... ☐ ☐

4.02 Have you noticed sudden changes in your pulse or heart rythm in the last year?  
☐ Yes  ☐ No

4.03 Do you become breathless in the following situations? (tick once for each question)

When you walk rapidly on level ground or up a moderate slope .......... ☐ ☐
When you walk calmly on level ground ............................................. ☐ ☐
While you are washing or dressing ...... ☐ ☐
At rest ............................................. ☐ ☐

4.04 Do you cough about daily for some periods of the year?  
☐ Yes  ☐ No

If YES: Is the cough usually productive?  
☐ Yes  ☐ No

Have you had this kind of cough for as long as 3 months in each of the last two years?  
☐ Yes  ☐ No

4.05 How often do you suffer from sleeplessness?  
(tick once)  
 никогда, or just a few times a year ☐
1-3 times a month ☐
 approximately once a week ☐
 more than once a week ☐

If you suffer from sleeplessness monthly or more often, what time of the year does it affect you most?  (Put one or more ticks)

☐ No particular time
☐ Polar night time
☐ Midnight sun time
☐ Spring and autumn

4.06 Have you had difficulty sleeping during the past couple of weeks?  
☐ Not at all
☐ No more than usual
☐ Rather more than usual
☐ Much more than usual

4.07 Have you during the last two weeks felt unhappy and depressed?  
☐ Not at all
☐ No more than usual
☐ Rather more than usual
☐ Much more than usual

4.08 Have you during the last two weeks felt unable to cope with your difficulties?  
☐ Not at all
☐ No more than usual
☐ Rather more than usual
☐ Much more than usual

4.09 Below, please answer a few questions about your memory: (tick once for each question)

Do you think that your memory has declined? ............................................. ☐ ☐

Do you often forget where you have placed your things? ......................... ☐ ☐

Do you have difficulties finding common words in a conversation? ...... ☐ ☐

Have you problems performing daily tasks you used to master? .......... ☐ ☐

Have you been examined for memory problems? ............................................. ☐ ☐

If YES to at least one of the first four questions above: Is this a problem in your daily life?  
☐ Yes  ☐ No
4.10 Have you during the last year suffered from pain and/or stiffness in muscles or joints in your neck/shoulders lasting for at least 3 consecutive months? (tick once for each line)

- Neck, shoulders
- Arms, hands
- Upper part of the back
- The lumbar region
- Hips, leg, feet
- Other places

4.11 Have you suffered from pain and/or stiffness in muscles or joints during the last 4 weeks? (tick once for each line)

- Neck, shoulders
- Arms, hands
- Upper part of the back
- The lumbar region
- Hips, leg, feet
- Other places

4.12 Have you ever had:

- Fracture in the wrist/forearm?
- Hip fracture?

4.13 Have you been diagnosed with arthrosis by a physician?

- Yes
- No

4.14 Do you have or have you ever had some of the following:

- Nickel allergy
- Pollen allergy
- Other allergies

4.15 Have you ever experienced infertility for more than 1 year?

- Yes
- No

4.16 To which degree have you had the following complaints during the last 12 months?

- Nausea
- Heartburn/regurgitation
- Diarrhoea
- Constipation
- Alternating diarrhoea and constipation
- Bloated stomach
- Abdominal pain

4.17 If you have had abdominal pain or discomfort during the last year:

- Was it located in your upper stomach?
- Were you bothered as often as once a week or more during the last 3 months?
- Do you feel symptoms relief after bowel movement?
- Are the symptoms related to more frequent or rare bowel movements than normally?
- Are the symptoms related to more loose or hard stool than normally?
- Do the symptoms appear after a meal?

4.18 Have you ever had:

- Gastric ulcer
- Duodenal ulcer
- Ulcer surgery

4.19 For women: Have you ever had a miscarriage?

- Yes
- No
- Do not know

4.20 For men: Have your partner ever had a miscarriage?

- Yes
- No
- Do not know

4.21 Have you been diagnosed with Dermatitis Herpetiformis (DH)?

- Yes
- No
- Do not know

4.22 Is your diet gluten-free?

- Yes
- No
- Do not know

4.11 Have you during the last year suffered from pain and/or stiffness in muscles or joints in your neck/shoulders lasting for at least 3 consecutive months? (tick once for each line)

4.23 Have you during the last year suffered from pain and/or stiffness in muscles or joints in your neck/shoulders lasting for at least 3 consecutive months? (tick once for each line)
4.23. Have you been diagnosed with coeliac disease, based on a biopsy from your intestine taken in a gastroscopy examination?
☐ Yes  ☐ No  ☐ Do not know

4.24. Do you have your natural teeth?
☐ Yes  ☐ No

4.25. How many amalgam tooth fillings do you have/have you had?
☐ 0  ☐ 1-5  ☐ 6-10  ☐ 10+

4.26. Have you been suffering from headache the last year?
☐ Yes  ☐ No
If No: go to section 5, food habits

4.27. What kind of headache are you suffering from?
☐ Migraine  ☐ Other headache

4.28. How many days per month do you suffer from headache?
☐ Less than one day  ☐ 1-6 days  ☐ 7-14 days  ☐ More than 14 days

4.29. Is the headache attacks usually:
(tick once for each line)
☐ Yes  ☐ No
Pounding/pulsatory pain
Pressing/tightening pain
Unilateral pain (right or left)

4.30. What is the normal intensity of your headache attacks?
☐ Mild (do not hinder normal activity)  ☐ Moderate (decrease normal activity)  ☐ Strong (block normal activity)

4.31. What is the normal duration of the headache attacks?
☐ Less than 4 hours  ☐ 4 hours - 1 day  ☐ 1-3 days  ☐ More than 3 days

4.32. If you suffer from headache, when during the year does it affect you most? (tick one or more)
☐ No particular time  ☐ Polar night time  ☐ Midnight sun time  ☐ Spring and/or Autumn

4.33. Before or during the headache, do you have a temporary:
Yes  No
Visual disturbances? (flickering, blurred vision, flashes of light)................. ☐ ☐
Unilateral numbness in your face or hand? .................................................... ☐ ☐
Aggravated pain by moderate physical activity? ............................................ ☐ ☐
Nausea and/or vomiting? .......................................................... ☐ ☐

4.34. Describe how many days you have been away from work or school during the last month due to headache?
Number of days.............................................. ☐
### 5. FOOD HABITS

#### 5.01 How often do you usually eat the following? (tick once for each line)

<table>
<thead>
<tr>
<th>Item</th>
<th>0-1 times per month</th>
<th>2-3 times per month</th>
<th>1-3 times per week</th>
<th>More than 3 times per week</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fresh water fish <em>(not farmed)</em></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Salt water fish <em>(not farmed)</em></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Farmed fish <em>(salmon, trout, char)</em></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Tuna fish <em>(fresh or canned)</em></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Fish bread spread</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Mussels, shells</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>The brown content in crabs</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Whale or seal meat</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Pluck <em>(liver/kidney/heart)</em> from reindeer or elk/moose.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Pluck <em>(liver/kidney/heart)</em> from ptarmigan/grouse</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### 5.02 How many times during the year do/did you usually eat the following? (number of times)

<table>
<thead>
<tr>
<th>Item</th>
<th>Number per year</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mølje <em>(cod or pollack meat, liver, and roe)</em></td>
<td></td>
</tr>
<tr>
<td>Sea gull's egg <em>(Number of eggs per year)</em></td>
<td></td>
</tr>
<tr>
<td>Reindeer meat <em>(Number of times per year)</em></td>
<td></td>
</tr>
<tr>
<td>Local mushroom and wild berries <em>(blueberries/lingonberries/cloudberry)</em></td>
<td></td>
</tr>
</tbody>
</table>

#### 5.03 How many times per month do you eat canned (tinned) foods (from metal boxes)?

<table>
<thead>
<tr>
<th>Item</th>
<th>Number</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### 5.04 Do you take vitamins and/or mineral supplements? (tick once)

<table>
<thead>
<tr>
<th>Yes, daily</th>
<th>Sometimes</th>
<th>Never</th>
</tr>
</thead>
</table>

#### 5.05 How often do you eat?

<table>
<thead>
<tr>
<th>Item</th>
<th>Never</th>
<th>1-3 times per month</th>
<th>1-3 times per week</th>
<th>4-6 times per week</th>
<th>1-2 times per day</th>
<th>3 times per day or more</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dark chocolate</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Light chocolate/milk chocolate</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Chocolate cake</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other sweets</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### 5.06 If you eat chocolate, how much do you usually eat each time?

Compared with the size of a Kvikk-Lunsj sjokolade *(a chocolate brand in the market)* and describe how much you eat in relation to it.

<table>
<thead>
<tr>
<th>Amount</th>
<th>¼</th>
<th>½</th>
<th>1</th>
<th>1 ½</th>
<th>2</th>
<th>More than 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

#### 5.07 How often do you drink cocoa/hot chocolate?

<table>
<thead>
<tr>
<th>Item</th>
<th>Never</th>
<th>1-3 times per month</th>
<th>1-3 times per week</th>
<th>4-6 times per week</th>
<th>1-2 times per day</th>
<th>3 times per day or more</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
6. ALCOHOL

6.01 How often have you in the last year:

- Not been able to stop drinking alcohol when you have started? 
- Failed to do what was normally expected of you because of drinking? 
- Needed a drink in the morning to get yourself going after a heavy drinking session? 
- Had feeling of guilt or remorse after drinking? 
- Not been unable to remember what happened the night before because of your drinking?

6.02 Have you or someone else been injured because of your drinking? 
Has a relative, friend, physician, or other health care workers been concerned about your drinking or suggested you to cut down?

7. WEIGHT

7.01 Have you involuntary lost weight during the last 6 months?

- Yes 
- No

If Yes: how many kilograms?

7.02 Estimate your body weight when you were 25 years old:
Number of kilograms

8. SOLVENTS

8.01 How many hours per week, do you do the following leisure- or professional activities:

- Automobile repair/paint, ceramic work, painting/varnishing/solvents, hair dressing, glazier, electrician. (Put 0 if you do not engage in such leisure or professional activities)

Number of hours per week on average

8.02 Do you use hair color preparations

- Yes 
- No

If Yes: How many times per year?
9. USE OF HEALTH SERVICES

- **Have you ever experienced that diseases have been insufficiently examined or treated, and this had a serious consequence?**
  - Yes, this has happened to me
  - Yes, this has happened to a close relative (child, parents, spouse)
  - No

  If Yes, was it caused by? (tick once or more):
  - general practitioner
  - emergency medical doctor
  - private practising specialist
  - hospital doctor
  - other health personnel
  - alternative practitioner
  - more than one person due to deficient routines and interaction

- **At the last visit to your GP, did you have a hard time to understand what the doctor(s) told you?** Answer on a scale from 0 to 10, where 0 = they were difficult to understand and 10 = they were always easy to understand.

  - Not relevant
  - Very difficult
  - Some difficulties
  - Easy
  - Very easy

- **How would you rate the treatment or counselling, you got at your last visit to your GP?** Answer on a scale from 0 to 10, where 0 = worst treatment or counselling and 10 = best treatment or counselling.

  - Not relevant
  - No problem
  - Some problem
  - Major problem

- **During the last 12 months, how much of a problem, if any, was it to get a referral to physiotherapist, chiropractor, etc.?**

  - Not relevant
  - No problem
  - Some problem
  - Major problem

- **Altogether, how much of a problem, if any, was it to get a referral to specialist health care?**

  - Not relevant
  - Very difficult
  - Some difficulties
  - Easy
  - Very easy
9.10 During the last 12 months, have you been examined or treated by the specialist health care?
☐ Yes  ☐ No

If Yes, did you have a difficult time to understand what the doctor(s) told you? Answer on a scale from 0 to 10, where 0 = they were difficult to understand and 10 = they were always easy to understand

0 1 2 3 4 5 6 7 8 9 10
☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐

9.11 How would you rate the treatment or counselling you got at your last visit to a specialist? Answer on a scale from 0 to 10, where 0 = worst treatment or counselling, and 10 = best treatment or counselling

0 1 2 3 4 5 6 7 8 9 10
☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐

9.12 Have you ever, previous to the year 2002, had an operation at a hospital or a specialist clinic?
☐ Yes  ☐ No

9.13 Have you, during the last 12 months, used herbal or natural medicine?
☐ Yes  ☐ No

9.14 Have you, during the last 12 months, used meditation, yoga, qi gong or thai chi as self-treatment?
☐ Yes  ☐ No
10. USE OF ANTIBIOTICS

10.01 Have you used antibiotics during the last 12 months? (all penicillin-like medicine in the form of tablets, syrups or injections)
- Yes
- No
- Do not remember

If YES: What did you get the treatment for?

Have you taken many antibiotic treatments, tick for each treatment.

<table>
<thead>
<tr>
<th>Treatment duration: number of days</th>
</tr>
</thead>
<tbody>
<tr>
<td>(bladder infection, cystitis)</td>
</tr>
<tr>
<td>(ear, sinus, throat or lung infection, bronchitis)</td>
</tr>
<tr>
<td>Other</td>
</tr>
</tbody>
</table>

10.02 Do you presently have antibiotics at home?
- Yes
- No

If YES: is this after an agreement with your physician for treatment of chronic or frequently recurring disease?
- Yes
- No

10.03 Would you consider using antibiotics without consulting your physician?
- Yes
- No

If YES: which conditions would you treat in such situation? (multiple ticks are possible)
- Common cold
- Cough
- Bronchitis
- Sore throat
- Sinusitis
- Fever
- Influenza
- Ear infection
- Diarrhoea
- Urinary tract infection
- Other infections

<table>

11. YOUR CIRCADIAN RHYTHM

We will ask you some questions about your sleeping habits

II.01 Have you worked in a shift work schedule during the last 3 months?
   - Yes  
   - No

II.02 Number of days per week which you **cannot** freely choose when you sleep (e.g. work days)?
   - 0 1 2 3 4 5 6 7
   - ☐  ☐  ☐  ☐  ☐  ☐  ☐  ☐

Then I go to bed at .................................................................
I get ready to fall asleep at .....................................................
Number of minutes I need to fall asleep .....................................
I wake up at ............................................................................
With help of: ☐ Alarm clock  ☐ External stimulus *(noise, family members etc.)*  ☐ By myself
Number of minutes I need to get up ...........................................

II.03 Number of days per week which you **can** freely choose when you sleep (e.g. free days or holidays)
   - 0 1 2 3 4 5 6 7
   - ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐

Then I go to bed at .................................................................
I get ready to fall asleep at .....................................................
Number of minutes I need to fall asleep .....................................
I wake up at ............................................................................
With help of: ☐ Alarm clock  ☐ External stimulus *(noise, family members etc.)*  ☐ By myself
Number of minutes I need to get up ...........................................
12. SKIN AND DERMATOLOGY

<table>
<thead>
<tr>
<th>12.01</th>
<th>How often do you usually take a shower or a bath? (tick once)</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ 2 or more times daily</td>
<td></td>
</tr>
<tr>
<td>☐ 1 time daily</td>
<td></td>
</tr>
<tr>
<td>☐ 4-6 times per week</td>
<td></td>
</tr>
<tr>
<td>☐ 2-3 times per week</td>
<td></td>
</tr>
<tr>
<td>☐ Once a week</td>
<td></td>
</tr>
<tr>
<td>☐ Less than once a week</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>12.02</th>
<th>How often do you usually wash your hands with soap daily? (tick once)</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ 0 times</td>
<td></td>
</tr>
<tr>
<td>☐ 1-5 times</td>
<td></td>
</tr>
<tr>
<td>☐ 6-10 times</td>
<td></td>
</tr>
<tr>
<td>☐ 11-20 times</td>
<td></td>
</tr>
<tr>
<td>☐ More than 20 times</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>12.03</th>
<th>Have you ever taken any antibiotics (penicillin and penicillin-like medicines) because of a skin disease, for example infected eczema, acne, non-healing leg ulcers, recurrent abscess?</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐ Yes</td>
<td>☐ No</td>
</tr>
</tbody>
</table>

If Yes: How many times in average per year did you take antibiotics during the period you were most affected (tick once):
| ☐ 1-2 |
| ☐ 3-4 |
| ☐ More than 4 times |

<table>
<thead>
<tr>
<th>12.04</th>
<th>Have you or have you ever had the following skin disorders? (tick once for each line)</th>

<tbody>
<tr>
<td>Yes</td>
<td>No</td>
</tr>
<tr>
<td>Armpits</td>
<td>Under the breasts</td>
</tr>
</tbody>
</table>

If Yes: Have you ever visited a physician because of abscesses?
| ☐ Yes | ☐ No |

If Yes, did you get any of the following treatments? (tick once for each line)
| Yes | No |
| Antibiotic ointment | Antibiotic tablets | Surgical drainage | A larger surgical intervention including skin removal | Surgical laser treatment |
Follow-up questions
INFORMATION TO FOLLOW-UP QUESTIONS

The following pages with questions should not be answered by everybody. If you have answered yes to one or more of questions below, we ask you to move on to the follow-up questions on the topic or topics you have answered yes to. The first four topics are from the first questionnaire and the last question is from this form.

We have for the sake of simplicity highlighted topics with different colours so that you will find the questions that applies to you.

If you answered YES to that you have: long-term or recurrent pain that has lasted for 3 months or more, please answer the questions on page 19 and 20. The margin is marked with green.

If you answered YES to that you have undergone any surgery during the last 3 years, please answer the questions on page 21 and 22. The margin is marked with purple.

If you answered YES to that you're working outdoors at least 25% of the time, or in facilities with low temperature, such as warehouse/industrial halls, please answer the questions on page 23. The margin is marked with red.

If you answered YES to that you have used non-prescription pain relievers, please answer questions on page 24. The margin is marked with orange.

If you answered YES to that you have or have ever had skin problems (such as psoriasis, atopic eczema, non-healing leg or foot ulcers, recurrent hand eczema, acne or abscesses), please answer the questions on page 25. The margin is marked with yellow.

If you have answered NO to these five questions, you are finished with your answers. The questionnaire is to be returned in the reply envelope you were given at the survey site. The postage is already paid.

Should you wish to give us written feedback on either the questionnaire or The Tromsø Study in general, you are welcome to that on page 26.

Do you have any questions, please contact us by phone or by e-mail. You can find the contact information on the back of the form. THANK YOU for taking the time to the survey and to answer our questions.
13. FOLLOW-UP QUESTIONS ON PAIN

You answered in the first questionnaire that you have protracted or constantly recurrent pain that has lasted for 3 months or more. Here, we ask you to describe the pain a little closer.

13.01 How long have you had this pain?
Number of years [___] months [___]

13.02 How often do you have this pain?
☐ Every day
☐ Once a week or more
☐ Once a month or more
☐ Less than once a month

13.03 Where does it hurt? (Tick for all locations where you have protracted or constantly recurrent pain)
☐ Head/face
☐ Jaw/temporo-mandibular joint
☐ Neck
☐ Back
☐ Shoulder
☐ Arm/elbow
☐ Hand
☐ Hip
☐ Thigh/knee/leg
☐ Ankle/foot
☐ Chest/breast
☐ Stomach
☐ Genitalia /reproductive organs
☐ Skin
☐ Other location

13.04 What do you believe is the cause of the pain? (Tick for all known causes)
☐ Accident /acute injury
☐ Long-term stress
☐ Surgical intervention/operation
☐ Herniated disk (prolapse) /lumbago
☐ Whiplash
☐ Migraine/headache
☐ Osteoarthritis
☐ Rheumatoid arthritis
☐ Bechterews syndrome
☐ Fibromyalgia
☐ Angina pectoris
☐ Poor blood circulation
☐ Cancer
☐ Nerve damage/neuropathy
☐ Infection
☐ Herpes zoster
☐ Another cause (describe below)
☐ Don't know

Describe the other cause:
.........................................................................................................................................................................................................

13.05 Which kind of treatment have you received for the pain? (Tick for all types of pain treatments you have received)
☐ No treatment
☐ Analgesic medications/painkillers
☐ Physiotherapy/chiropractic treatment
☐ Treatment at a pain clinic
☐ Surgery
☐ Psycho-educative/relaxation training/psychotherapy
☐ Acupuncture
☐ Complimentary and alternative medicine (homeopathy, healing, aromatherapy, etc.)
☐ Other treatment
On a scale of 0 to 10, where 0 corresponds to no pain and 10 corresponds to the worst possible pain you can imagine:

- How strong would you say that the pain usually is? ...........................................
- How strong is the pain when it is in its strongest intensity? ................................
- To what degree does the pain interfere with your sleep? ...........................
- To what degree does the pain interfere with performing common activities at home and at work? .......
In the first questionnaire you answered that you have undergone an operation during the last 3 years.

14.01 How many times have you undergone surgery during the last 3 years?
Number ......................................................................................................................................................................................

Below, please describe the operation. If you have undergone several operations during the last 3 years, these questions concern the last surgery you underwent.

14.02 Where in your body did you have surgery? (If you were operated simultaneously in several places in the body, tick more than once)
Surgery in the head/neck/back
- Head/face ........................................
- Neck/throat .....................................
- Back .....................................................
Surgery in the chest
- Heart ..................................................
- Lungs ................................................
- Breasts .............................................
- Another surgery in the chest region ..........
Surgery in the stomach/pelvis
- Stomach/intestines .........................
- Inguinal hernia ..............................
- Urinary tract/reproductive organs ....
- Gall bladder/biliary tract ...........
- Another surgery in the stomach/pelvis ....
Surgery in the hip/legs
- Hip/thigh .......................................... 
- Knee/leg .........................................
- Ankle/foot ....................................... 
- Amputation ......................................
Surgery in the shoulder and arm
- Shoulder/overarm .........................
- Elbow/underarm .............................
- Hand .............................................
- Amputation .....................................

14.03 Reason for the surgery:
Acute illness/trauma ......................... 
Planned non-cosmetic operation ......
Planned cosmetic operation ...........

14.04 Where did you have the surgery?
The hospital in Tromsø .....................
The hospital in Harstad .....................
Other public hospital ......................
Private clinic ..................................

14.05 How long time is it since you had surgery?
Number of years ....
Months ..... 

14.06 Do you have reduced sensitivity in an area near the surgical scar?
□ Yes □ No

14.07 Are you hypersensitive to touch, heat or cold in an area near the surgical scar?
□ Yes □ No

14.08 Does slight touch from clothes, showering or similar cause discomfort/pain?
□ Yes □ No

14.09 If you had pain at the site of surgery before you had surgery, do you have the same type of pain now?
□ Yes □ No
The pain at the site of surgery: Answer on a scale from 0 to 10, where 0=no pain and 10=worst pain you can imagine

How strong pain did you have at the site of surgery before you had surgery

No pain

How strong pain do you normally have at the site of surgery now

No pain

How strong pain do you normally have at the site of surgery when it is most intense

No pain
15. FOLLOW-UP QUESTIONS ABOUT WORK IN COLD ENVIRONMENT

In the first questionnaire you answered yes to that you work in cold environments. Here are some follow-up questions that we hope you will answer.

**15.01 Do you feel cold at work?**
- [ ] Yes, often
- [ ] Yes, sometimes
- [ ] No, never

**15.02 For how long have you been exposed to cold air below 0°C during the last winter?**
- Leisure/hobbies (hours/week) ........................................
- Work (hours/week) ...........................................................
- Outdoors, with suitable clothing (hours/week) ..................
- Outdoors, without suitable clothing (hours/week) ............
- Indoors, with no heating (hours/week) ............................
- In cold, with wet clothing (hours/week) ..........................
- Contact with cold objects/tools (hours/week) ...................

**15.03 What ambient temperature prevents you from:**
- Working outdoors ..............................................
- Training outdoors ..............................................
- Performing other activities outdoors ..........................

**15.04 Have you during the last 12 months had a frostbite with blisters, sores or skin injury?**
- [ ] Yes
- [ ] No

If Yes, how many times? ..........................................

**15.05 Have you had itching and/or rash in relation to cold exposure?**
- [ ] Yes
- [ ] No

**15.06 Have you during the last 12 months had an accident where cold has been involved, and which required medical treatment?**
- Yes
- No

At work .................................................................
In leisure time ......................................................

**15.07 Do you experience any of the following symptoms while you are in a cold environment? If so, at what temperature do the symptoms occur?**
- Breathing problems..............................................
- Wheezy breathing ................................................
- Mucus secretion from lungs ....................................
- Chest pain ...........................................................
- Disturbance in heart rhythm .................................
- Impaired blood circulation in hands/feet .................
- Visual disturbance (short term/transient) .................
- Migraine (short term/transient) ..............................
- Fingers turning white (short term/transient) .............
