Dataverse Community Meeting 2015 | June 9, 10, 11, IQSS, Harvard University

CC BY

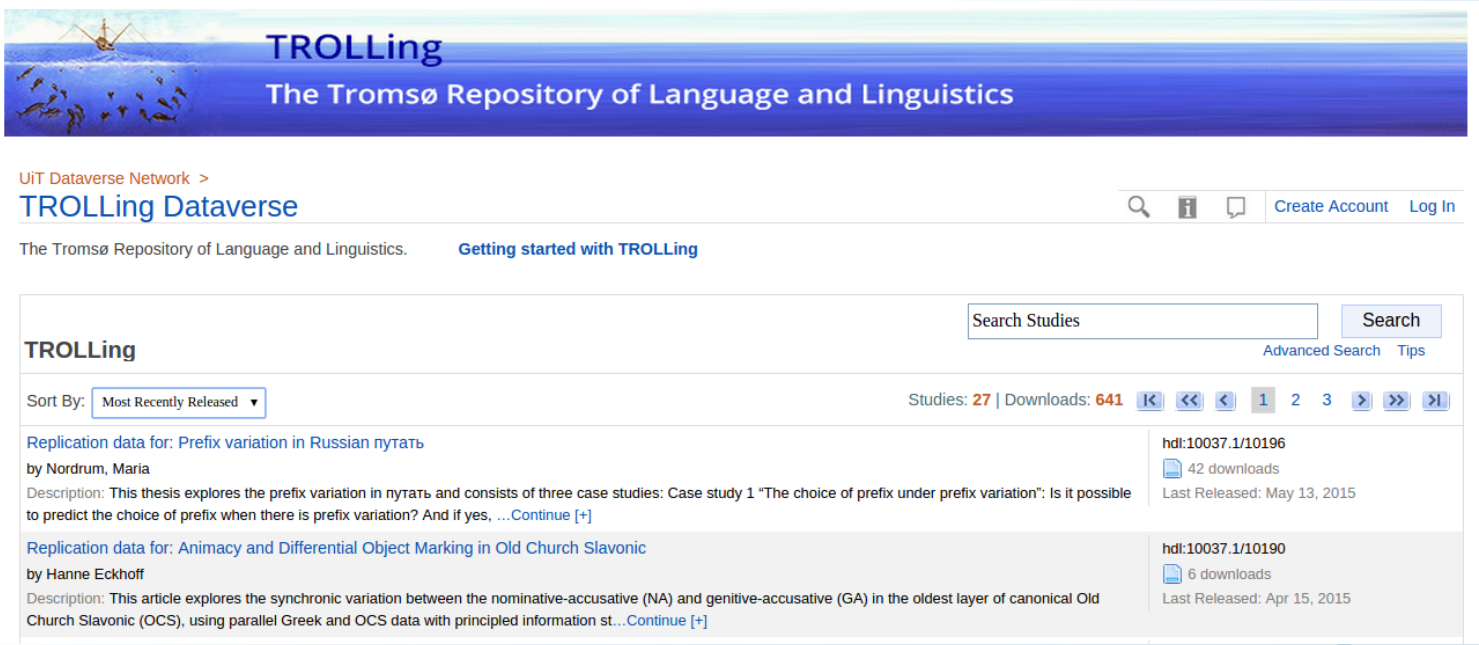
UNIVERSITY OF TROMSØ

# How it started

- Long tradition of Open Access to publications at UiT Library
- Plans to get started with open access to research data
- In 2013 request from the linguistics community at UiT for open access service for linguistic research data and statistical code
- Project group:
  - Members: University library and faculty staff from linguistics department
  - Main task: Discussing basic functionalities and requirements

# TROLLing – The Tromsø Repository of Language and Linguistics

- Research data and statistical code in the field of language and linguistics
- One dataverse – serveral studies
- Data contributors may come from anywhere in the world
- Limited to open data
- Officially launched on 18th June 2014
- More info on TROLLing blog site: http://site.uit.no/trolling/



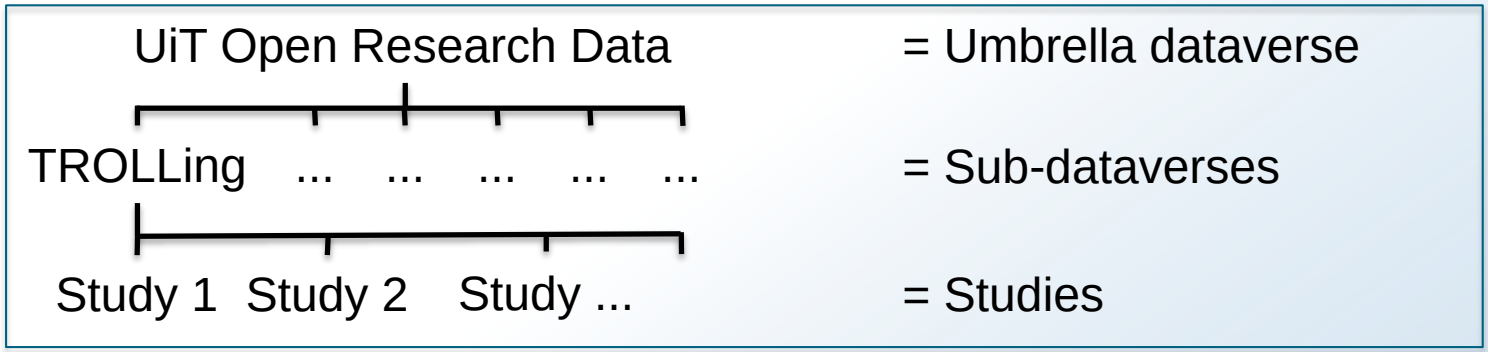
# The role of the library in TROLLing

- Curation carried out by subject librarians:
  - Contributor approval
  - Relevance of uploaded data
  - Quality and comprehensiveness of metadata
  - Structure and format of uploaded data
  - Releasing approved studies

- In cooperation with the faculty staff at UiT:
  - How-to and best practice guides
  - Promotion: Conferences, contact with editors, videos, ...

# TROLLing and UiT Open Research Data

- TROLLing = Dataverse pilot to be followed by other academic disciplines and research communities at UiT
- **UiT Open Research Data** (http://opendata.uit.no) = a general open access service at UiT for sharing, citing, preserving, discovering, analyzing and reusing research data



- Expanding the service to other subject areas will likely be done at the institutional level:
  - Inviting research communities at UiT
  - Establishing new members of UiT ORD in collaboration
